Reforming Higher Education:

Making Reform Work Robert Zemsky, 2009-08-11 *Making Reform Work* is a practical narrative of ideas that begins by describing who is saying what about American higher education who is angry who is disappointed and why Most of the pleas for changing American colleges and universities that originate outside the academy are lamentations on a small number of too often repeated themes The critique from within the academy focuses on issues principally involving money and the power of the market to change colleges and universities Sandwiched between these perspectives is a public that still has faith in an enterprise that it really doesn't understand Robert Zemsky one of a select group of scholars who participated in Secretary of Education Margaret Spellings's 2005 Commission on the Future of Higher Education signed off on the commission's report with reluctance In *Making Reform Work* he presents the ideas he believes should have come from that group to forge a practical agenda for change Zemsky argues that improving higher education will require enlisting faculty leadership on the one hand and on the other a strategy for changing the higher education system writ large Directing his attention from what can't be done to what can be done Zemsky provides numerous suggestions These include a renewed effort to help students performance in high schools and a stronger focus on the science of active learning not just teaching methods He concludes by suggesting a series of dislodging events for example making a three year baccalaureate the standard undergraduate degree congressional rethinking of student aid in the wake of the loan scandal and a change in the rules governing endowments that could break the gridlock that today holds higher education reform captive *Making Reform Work* offers three rules for successful college and university transformation don't vilify don't play games and come to the table with a well thought out strategy rather than a sharply worded lamentation

Reforming Higher Education Christine Musselin, Pedro N. Teixeira, 2013-10-07 This book analyzes the reforms that led to a differentiated landscape of higher education systems after university practices and governance were considered poorly adapted to contemporary settings and to their new missions This has led to a growing institutional differentiation in many higher education systems This differentiation has certainly contributed to making the institutional landscape more diverse across and within higher education systems This book covers this diversity Each part corresponds to a different but complementary way of looking at reforms and highlights what can be learnt on specific cases by adopting a specific perspective The first part analyzes the ongoing reforms and their evolution identifies their internal contradictions as well as the redefinitions and reorientations they experience and reveals the ideas representations ideologies and theories on which they are built The second part includes comparison between countries but also other comparative perspectives such as how one reform is developed in different regions of the same country as well as

how comparable reforms are declined to different sectors The last part addresses the impact of the reforms What is known about the effectiveness of such instruments on higher education systems This part shows that reforms provoke new power games and reconfigure power relations

The University We Need Warren Treadgold, 2018-07-10 Though many people know that American universities now offer an inadequate and incoherent education from a leftist viewpoint that excludes moderate and conservative ideas few people understand how much this matters how it happened how bad it is or what can be done about it In *The University We Need* Professor Warren Treadgold shows the crucial role of universities in American culture and politics the causes of their decline in administrative bloat and inept academic hiring the effects of the decline on teaching and research and some possible ways of reversing the downward trend He explains that one suggested reform the abolition of tenure would further increase the power of administrators further decrease the quality of professors and make universities even more doctrinaire and intolerant Instead he proposes federal legislation to monitor the quality and honesty of professors and to limit spending on administration to no more than 20 percent of university budgets Harvard now spends 40 percent Finally he offers a specific proposal for the founding of a new leading university that could seriously challenge the dominance of Harvard Princeton Yale Stanford and Berkeley and attract conservative and moderate faculty and students now isolated in universities and colleges that are either leftist or mediocre While agreeing with conservative critics that universities are in severe crisis Treadgold believes that the universities problems largely transcend ideology and have grown worse partly because disputants on both sides of the academic debate have misunderstood the methods and goals of higher education

Milton Leontiades, 2007-04-01 Higher education in America is the best in the world but it is also desperately in need of reform Lacking effective competition and insulated from market forces universities have created a model fundamentally at odds with free market principles In a system few outsiders comprehend universities uniquely are run for the benefit of faculty Increasingly top universities have come to resemble closed academic societies Admission is by way of a Ph D degree Mastery of abstract research for its own sake is the route to promotion and advancement Teaching is of incidental importance for tenure the goal of every academic Achieving tenure assures long term employment without mandatory retirement plus freedom from inhibitions on speech or actions Faculty share governance with an administration although faculty lack managerial skills or responsibility for their recommendations Politically conformist faculty think one way and recruit newcomers who think alike Given time institutions that do not attract strong leaders or demand accountability from faculty are destined to underperform Cracks in the seams of the current system are emerging in out of control costs and greater competition Lacking normal measures of efficiency or productivity universities costs tend to spiral higher with future escalation a given The trends are clear but not yet ominous Without reform America s universities are coasting Can reforms take hold before a crisis is reached Only if strong voices demand it Reform from universities that are characterized by intellectual inbreeding and self regulation cannot be expected Assuring future generations of a quality education is the collective responsibility and duty of the citizenry Based on an inside out view of universities this book provides the ammunition for such a campaign It provides the information and stimulus for reform for legislators community leaders academics and average citizens

University Reform Philip G. Altbach, 1980 *Reforming the Higher Education Curriculum* Josef A. Mestenhauser, Brenda J. Myth, Reality, and Reform Cláudio de Moura Castro, Daniel C. Crisis on Campus Mark C. Taylor, 2010-08-31 A provocative look at the troubled present state of American higher education and a passionately argued and learned manifesto for its future In Crisis on Campus Mark C Taylor

chair of the Department of Religion at Columbia University and a former professor at Williams College expands on and refines the ideas presented in his widely read and hugely controversial 2009 New York Times op ed His suggestions for the ivory tower are both thought provoking and rigorous End tenure Restructure departments to encourage greater cooperation among existing disciplines Emphasize teaching rather than increasingly rarefied research And bring that teaching to new domains using emergent online networks to connect students worldwide As a nation he argues we fail to make such necessary and sweeping changes at our peril Taylor shows us the already rampant consequences of decades of organizational neglect We see promising graduate students in a distinctly unpromising job market relegated if they re lucky to positions that take little advantage of their training and talent We see recent undergraduates with massive burdens of debt and anxious parents anticipating the inflated tuitions we will see in ten or twenty years We also see students at all levels chafing under the restrictions of traditional higher education from the structures of assignments to limits on courses of study But it doesn t have to be this way Accommodating the students of today and anticipating those of tomorrow attuned to schools financial woes and the skyrocketing cost of education Taylor imagines a new system one as improvisational as responsive to new technologies and as innovative as are the young members of the iPod and Facebook generation In Crisis on Campus we have an iconoclastic necessary catalyst for a national debate long overdue

The Struggle to Reform Our Colleges Derek Bok, 2017-08-28 Why

efforts to improve American higher educational attainment haven t worked and where to go from here During the first decade of this century many commentators predicted that American higher education was about to undergo major changes that would be brought about under the stimulus of online learning and other technological advances Toward the end of the decade the president of the United States declared that America would regain its historic lead in the education of its workforce within the next ten years through a huge increase in the number of students earning quality college degrees Several years have elapsed since these pronouncements were made yet the rate of progress has increased very little if at all in the number of college graduates or the nature and quality of the education they receive In The Struggle to Reform Our Colleges Derek Bok seeks to explain why so little change has occurred by analyzing the response of America s colleges the influence of students employers foundations accrediting organizations and government officials and the impact of market forces and technological innovation In the last part of the book Bok identifies a number of initiatives that could improve the performance of colleges and universities The final chapter examines the process of change itself and describes the strategy best calculated to quicken the pace of reform and enable colleges to meet the challenges that confront them
