Reforming Medicine Lessons From The Last Quarter Century:

Reforming Medicine Victor W. Sidel, Ruth Sidel, 1984 *More Than Medicine* Jennifer Nelson, 2015-03-06 This book reveals how feminists of the 60s and 70s applied the lessons of the new left and civil rights movements to generate a women's health movement. The new movement shifted from the struggle to revolutionize health care to the focus of ending sex discrimination and gender stereotypes perpetuated in mainstream medical contexts. Moving from the campaign for legal abortion to the creation of community clinics and feminist health centers, Nelson illustrates how these activists revolutionized health care by associating it with the changing social landscape in which women had power to control their own life choices.

The Good Doctors John Dittmer, 2017-01-31 In the summer of 1964, medical professionals, mostly white and northern, organized the Medical Committee for Human Rights (MCHR) to provide care and support for civil rights activists organizing black voters in Mississippi. They left their lives and lucrative private practices to march beside and tend the wounds of demonstrators from Freedom Summer, the March on Selma, and the Chicago Democratic Convention of 1968. Galvanized and sometimes radicalized by their firsthand view of disenfranchised communities, the MCHR soon expanded its mission to encompass a range of causes from poverty to the war in Vietnam. They later took on the whole of the United States healthcare system. MCHR doctors soon realized fighting segregation would mean not just caring for white volunteers but also exposing and correcting shocking inequalities in segregated health care. They pioneered community health plans and brought medical care to underserved or unserved areas. Though education was the most famous battleground for integration, the appalling injustice of segregated health care levelled equally devastating consequences. Award-winning historian John Dittmer, author of the classic civil rights history *Local People: The Struggle for Civil Rights in Mississippi*, has written an insightful and moving account of a group of idealists who put their careers in the service of the motto "Health Care Is a Human Right." *An American Health Dilemma: Race, medicine, and health care in the United States 1900-2000* W. Michael Byrd, Linda A. Clayton, 2000 This volume is a comprehensive collection of critical essays on *The Taming of the Shrew* and includes extensive discussions of the play's various printed versions and its theatrical productions. Aspinall has included only those essays that offer the most influential and controversial arguments surrounding the play. The issues discussed include gender authority, female autonomy, and unruliness; courtship and marriage; language and speech; and performance and theatricality. **Communities of Health Care Justice** Charlene Galarneau, 2016-11-03 The factions debating health care reform in the United States have gravitated toward one of two positions: that just health care is an individual responsibility or that it must be regarded as a national concern. Both arguments overlook a third possibility: that justice in health care is multilayered and requires the participation of multiple and diverse communities. *Communities of Health Care Justice* makes a powerful ethical argument for treating communities as critical moral actors that play key roles in defining and upholding just health policy. Drawing together the key community dimensions of health care and demonstrating their neglect in most

prominent theories of health care justice Charlene Galarneau postulates the ethical norms of community justice In the process she proposes that while the subnational communities of health care justice are defined by shared place including those bound by culture religion gender and race that together they define justice As she constructs her innovative theorization of health care justice Galarneau also reveals its firm grounding in the work of real world health policy and community advocates Communities of Health Care Justice not only strives to imagine a new framework of just health care but also to show how elements of this framework exist in current health policy and to outline the systemic conceptual and structural changes required to put these justice norms into fuller practice Gender Justice and the Health Care System

Karen L. Baird, 2019-01-22 This book focuses on gender justice and the health care system It will be divided into two parts In Part One a framework of gender justice will be developed What is gender justice What would a gender just public policy look like What criteria should such policies meet In Part Two the framework will be applied to the area of health care policy specifically medical research and health care financing and delivery An analysis of past policies will be made as well as an analysis of the recently enacted and proposed changes First published in 1998 Routledge is an imprint of Taylor Francis an informa company Community Health Centers Bonnie Lefkowitz, 2007 This book tells the story of one groundbreaking approach to medicine that attacks the problem by focusing on the wellness of whole neighborhoods Since their creation during the 1960s community health centers have served the needs of the poor in the tenements of New York the colonials of Texas the working class neighborhoods of Boston and the dirt farms of the South As products of the civil rights movement the early centers provided not only primary and preventive care but also social and environmental services economic development and empowerment Future Survey Annual 1984 World Future Society, 1984-06-01 Handbook of Clinical Sociology Howard M. Rebach, John G. Bruhn, 2012-12-06 Clinical sociology is an action oriented field that seeks to prevent reduce or resolve the seemingly overwhelming number of social problems confronting modern society In an extensive revision of the first edition of this classic text and reference published by Plenum in 1990 the editors have assembled a distinguished roster of contributors to address such topics as theory and practice intervention at various levels of social organization specific kinds of sociological practice social problems and the process of becoming a clinical sociologist

Social Functions and Economic Aspects of Health Insurance William A. Rushing, 2012-12-06 Statistics published by the U S Department of Commerce 1980 indicate that in 1977 we spent 8.1% of our gross national product GNP on life health property casualty and other forms of insurance An additional 5.7% was used to pay the Social Security tax which is another form of insurance premium for a total of 14.8% of the GNP Although insurance had its historical origin in marine insurance it has now developed into one of the major industries of the American economy and extends into many areas of economic activity One area where growth has been particularly strong is the medical sector Health insurance is a major institution in all industrialized countries It became a government responsibility in 1883 when Bismarck introduced a compulsory program

of health insurance for industrial workers in Germany Programs for workers in various industrial and income categories soon followed in other European countries Austria 1888 Hungary 1891 Norway 1909 Serbia 1910 Great Britain 1911 and Russia and Romania 1912 Rubinow 1913 250 Programs in these countries were extended in subsequent years and other countries in Europe followed with their own programs Consequently today most industrial countries have universal or near universal health insurance coverage In the United States the issue of national health insurance has been seriously debated since just prior to World War I and polling data since the 1930s show that a substantial majority of the public has been supportive of such a program Erskine 1975 **National Library of Medicine Current Catalog** National Library of Medicine (U.S.),

Sickness and Healing Robert A. Hahn, 1995-01-01 Anthropologist and epidemiologist Robert A Hahn examines how culture influences the definition experience and treatment of sickness in Western and non Western societies **The Fight Against Big Tobacco** Mark Wolfson, 2017-07-12 Tobacco control leaders were extremely proud of the movement's achievements in the state of Minnesota In sharing their perspectives and experiences with Mark Wolfson they found a way of making sure that the story would get told His training in social movements had given him an appreciation of the importance of understanding the social infrastructure on which movements are built and Minnesota had built heavily on the infrastructure of health care and public health What became apparent is that the struggle against the tobacco industry in Minnesota involved a close collaborative relationship between government or state actors and the leaders of the tobacco control movement Wolfson develops both of these themes building on the infrastructure of health and state movement interpenetration to understand the emergence growth and outcomes of the tobacco control movement in Minnesota He focuses on the advantages and constraints associated with these two related themes He goes beyond the case study method to assess the generalizability of the pattern and whether the same sort of movement can be used by other states in North America and even in other countries and their social movements How has the tobacco control movement become such a significant and successful force in shaping public policy social norms and the habits of millions of Americans In this first such detailed study by a sociologist Wolfson documents how the movement has grown over nearly three decades by building an infrastructure of health organizations and health professionals and by fostering relationships with government Rich in survey data extensive interviews and archival sources this text is essential reading for courses in social problems social movements and public health The general reader will also find it engaging given the issues of tobacco use as an addiction and a social problem **Health Policies and Black Americans** David P. Willis, 1989-01-01 Demography and epidemiology sociology and economics political science and policy analysis are all brought to bear in this rigorous yet fair minded examination an excellent timely and useful volume Paul D Stolley University of Pennsylvania **Federal Influences on Biomedical Technology Innovation** Lilly B. Gardner, 2018-03-26 Published in 1994 this book examines a small segment of the medical technology innovation process to characterize the manner in which the federal government influences small business based

investigators to participate or withdraw from the medical technology innovation process It provides an historical account of the federal government's involvement in biomedical technology research and development and traces the social and economic significance of this involvement

Making Gray Gold Timothy Diamond, 2009-06-12 This first hand report on the work of nurses and other caregivers in a nursing home is set powerfully in the context of wider political economic and cultural forces that shape and constrain the quality of care for America's elderly Diamond demonstrates in a compelling way the price that business as usual policies extract from the elderly as well as those whose work it is to care for them In a society in which some two million people live in 16 000 nursing homes with their numbers escalating daily this thought provoking work demands immediate and widespread attention An unnerving portrait of what it's like to work and live in a nursing home By giving voice to so many unheard residents and workers Diamond has performed an important service for us all Diane Cole New York Newsday With *Making Gray Gold* Timothy Diamond describes the commodification of long term care in the most vivid representation in a decade of round the clock institutional life A personal addition to the troublingly impersonal national debate over healthcare reform Madonna Harrington Meyer Contemporary Sociology

The Struggle for Workers' Health Ray H. Elling, 2020-10-07 To better understand how strong worker protection systems differ from weak ones this volume reports and interprets a study carried out in six nations Sweden Finland The German Democratic Republic The Federal Republic of Germany The United Kingdom of Great Britain and Northern Ireland and the United States of America The work involved interviews with reputational leaders of different interest groups as well as observations extensive document study and correspondence with key informants
