Community College Movement in Perspective Martin Quigley, Thomas W. Bailey, 2003 This work offers an historical and contemporary structure covering The Truman Commission the U S Scene in 1947 guidelines for the establishment of two year colleges and the enduring role played by Teachers College

Gateway to Opportunity? J. M. Beach, 2023-07-03 Can the U S keep its dominant economic position in the world economy with only 30% of its population holding bachelor s degrees If the majority of U S citizens lack a higher education can the U S live up to its democratic principles and preserve its political institutions These questions raise the critical issue of access to higher education central to which are America s open access low cost community colleges that enroll around half of all first time freshmen in the U S Can these institutions bridge the gap and how might they do so The answer is complicated by multiple missions gateways to 4 year colleges providers of occupational education community services and workforce development as well as of basic skills instruction and remediation To enable today s administrators and policy makers to understand and contextualize the complexity of the present this history describes and analyzes the ideological social and political motives that led to the creation of community colleges and that have shaped their subsequent development In doing so it fills a large void in our knowledge of these institutions The junior college later renamed the community college in the 1960s and 1970s was originally designed to limit access to higher education in the name of social efficiency Subsequently leaders and communities tried to refashion this institution into a tool for increased social mobility community organization and regional economic development Thus community colleges were born of contradictions and continue to be an enigma This history examines the institutionalization process of the community college in the United States casting light on how this educational institution was formed for what purposes and how has it evolved It uncovers the historically conditioned rules procedures rituals and ideas that ordered and defined the particular educational structure of these colleges and focuses on the individuals organizations ideas and the larger political economy that contributed to defining the community college s educational missions and have enabled or constrained this institution from enacting those missions He also sets the history in the context of the contemporary debates about access and effectiveness and traces how these colleges have responded to calls for accountability from the 1970s to the present Community colleges hold immense promise if they can overcome their historical legacy and be re institutionalized with unified missions clear goals of

educational success and adequate financial resources This book presents the history in all its complexity so that policy makers and practitioners might better understand the constraints of the past in an effort to realize the possibilities of the future *The Knowledge Economy and Postsecondary Education* National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Committee on the Impact of the Changing Economy on the Education System, 2002-05-11 The Workshop on the Knowledge Economy and Postsecondary Education documents changes seen in the postsecondary education system In her report Lisa Hudson focuses on who is participating in postsecondary education Tom Bailey concentrates on community colleges as the most responsive institutions to employer needs Carol Twigg surveys the ways that four year institutions are attempting to modify their curricular offerings and pedagogy to adapt those that will be more useful and Brian Pusser emphasizes the public's broader interests in higher education and challenges the acceptance of the primacy of job preparation for the individual and of market metaphors as an appropriate descriptor of American higher education An example of a for profit company providing necessary instruction for workers is also examined Richard Murnane Nancy Sharkey and Frank Levy investigate the experience of Cisco high school and community college students need to testify to their information technology skills to earn certificates Finally John Bransford Nancy Vye and Helen Bateman address the ways learning occurs and how these can be encouraged particularly in cyberspace **Public Policy**
