George J Demko, 1998-12-25 Using an integrative approach to international relations the second edition of *Reordering the World* returns the geo to geopolitical analysis of current global issues The contributors focus on key emerging world issues such as spatial data technology IGOs NGOs gender and world politics boundary disputes refugee flows ecological degradation and UN intervention in civil wars They also assess the redefinition of international relations by instantaneous worldwide financial and telecommunication linkages and explore the struggles of new multinational and nongovernmental organizations to define their roles Using current real world examples this group of eminent geographers challenges the reader to rethink international relations and reorder the world political map **Reordering The World** George J

Demko, William Wood, 1994-05-11 *Geopolitics at the End of the Twentieth Century* Nurit Kliot, David Newman, 2013-11-05 An excellent examination of how the collapse of the Soviet Union and the impact of globalization have brought about changes not only to the territorial configuration sovereignty of states and their boundaries but also to traditional notions of state boundaries sovereignty and social order These essays focus on the key regional and geopolitical characteristics of this global reordering with an emphasis on Eastern Europe and South Asia They discuss the territorial reordering which is taking place at the level of the state as boundaries are redemarcated in line with ethno territorial demands as borders are transversed by the movement of peoples information and finance and as the lines of territorial demarcation are perceived not only in terms of their fixed characteristics but as part of a process through which regional and ethnic identities continue to be formed and reformed Each section ends with articles which focus on literature on geopolitics and boundaries This is an invaluable addition to our understanding of contemporary world affairs **Holding the Line** Ian Townsend Gault, Heather Nora

Nicol, 2005 This volume contains contributions from twenty four scholars concerning the significance and implications of the world's borderlands in economic political and socio cultural contexts Together these essays explore the changing role of borders in a global world Are borders increasingly irrelevant under conditions of globalization or can a case be made to demonstrate their continuing importance at various levels of spatial activity Situating itself within a growing border literature *Holding the Line* argues that contemporary borders facilitate parallel processes of globalization and localization of

political activity As such the essays adopt a holistic approach to understanding the impact of boundaries on both society and space They demonstrate that any attempt to create a methodological and conceptual framework for the understanding of boundaries must be concerned with the process of bounding rather than simply the means through which the physical lines of separation are delimited and demarcated This approach renders the notion of a borderless world highly problematic because the latter ignores the important and ongoing relationship between the functional role of borders in the bounding process and the symbolic role of borders as imagined social political and economic constructions embedded within a geographical text The changing characteristics of political boundaries during an era of globalization has become a great focus of interdisciplinary study and this book will appeal to scholars of political geography border studies and international relations

Geography in America at the Dawn of the 21st Century Gary L. Gaile, Cort J. Willmott, 2005 Geography in America at the Dawn of the 21st Century surveys American geographers current research in their specialty areas and tracks trends and innovations in the many subfields of geography As such it is both a state of the discipline assessment and a topical reference It includes an introduction by the editors and 47 chapters each on a specific specialty The authors of each chapter were chosen by their specialty group of the American Association of Geographers AAG Based on a process of review and revision the chapters in this volume have become truly representative of the recent scholarship of American geographers While it focuses on work since 1990 it additionally includes related prior work and work by non American geographers The initial Geography in America was published in 1989 and has become a benchmark reference of American geographical research during the 1980s This latest volume is completely new and features a preface written by the eminent geographer Gilbert White

The Black Book Wesley J. Reisser, 2012-03-29 Prior to the end of World War I President Wilson gathered a group of expert geographers historians economists and political scientists The Inquiry to make plans for the coming peace conference The Inquiry produced a secret document the Black Book containing maps and plans for the territorial settlements to be negotiated This secret plan was brought daily by the President into negotiations and much of it came to fruition on the world map This work takes an in depth look at the Black Book and the lasting legacy of American negotiators at the Paris Peace Conference Many of the successes and failures from these peace settlements trace directly back to this remarkable and heretofore almost unstudied plan

Geography and Politics Among Nations Martin Sicker, 2010-06-01 Geography and Politics Among Nations is intended to assist the general reader to grasp the significance of geopolitical awareness in the conduct of foreign relations Toward this end the book begins with a cursory review of selected examples of geopolitical thought from antiquity to the present which illustrates some of the main tendencies in geopolitical thinking throughout history This survey of both past and recent geopolitical thinking is followed by a discussion of the intimate relationship between geographical and geostrategic considerations and realistic foreign policy and then continues with consideration of basic factors affecting geopolitical decision making such as the size of a state its configuration climate and often most

critically its global and regional location This is followed by a discussion of the frontiers boundaries and borderlands that separate and define the territories of states and the impact on them of technological advancements which is then followed by an examination of the variety of territorial disputes among nations past and present many of which remain unresolved The book concludes with a brief discussion of some of the continuing and prospective geopolitical challenges that are likely to be confronted in the course of the present century
