Elusive Development Marshall Wolfe,1996 This deeply thoughtful book explores some of the very difficult questions thrown up by the development process Marshall Wolfe reviews what has been said and done in the name of development over four decades He sees development as a Sisyphean task of trying to impose value oriented rationality on realities that remain permanently recalcitrant to such reality precisely because its key actors be they the state social groups development agencies individual experts or the market cannot be assumed to be either benevolent or consistently rational

Globalisation and Africa Daniel A. Offiong,2013 Globalisation is often conceptualised as a triumphant juggernaut a massive inexorable force transforming economies politics and culture and inevitably vanquishing endemic poverty in poor countries This is in line with what modernisation theorists envisaged in the 1950s and 1960s Unfortunately globalisation just like modernisation has failed Africa Globalisation has intensified poverty and underdevelopment and the consequences are reflected in the huge debt burden of most Third World countries Globalisation and Africa Reverse Robin Hoodism calls for a new international economic order in which Africa and other Third World countries will participate as interdependent entities and by so doing end the symmetric relationship in which the wealthy countries enjoy huge advantages financial economic and others over poor countries

Invisible Governance John Mathiason,2007 International public servants and their far reaching secretariats receive little press attention when nation states take the spotlight in significant international events which is why author John Mathiason and others commonly refer to them as invisible But secretariats activities are constantly shaping the course of history with inspectors determining whether uranium enrichment in Iran is for peaceful purposes maintaining surveillance on a possible bird flu epidemic the World Health Organization raising alarms about starvation in Zimbabwe the World Food Programme or passing judgment on former heads of state and military officers in the Balkans the United Nations war crimes tribunal Having served as a member of the United Nations Secretariat for 25 years author John Mathiason offers a unique behind the scenes view taking readers through of the life and duties of an international public servant Through personal accounts and extensive knowledge of a variety of international organizations Mathiason covers the implications of being an influential but invisible entity He charts the difficulties in documenting scope and accountability the issues such as disarmament human rights and environmental protection that he encountered while serving at the secretariat and charts the history of these dynamic and expansive entities present in every crucial event of the past century By looking at the international public sector as an actor in its own right Invisible Governance provides a new perspective on the workings of

the international system and tools and approaches for ensuring that the system works effectively and with accountability

Climate Action in a Globalizing World Carl Cassegard,Linda Soneryd,Hakan Thorn,Asa Wettergren,2017-05-18 The existence and urgency of global climate change is a matter of scientific consensus Yet the global politics of climate change have been anything but consensual In this context a wave of global climate activism has emerged in the last decade in response to the perceived failure of the political negotiations This book provides a unique comparative study of environmental movements in USA Japan Denmark and Sweden analyzing their interaction with the international climate institutions of the United Nations with national governments and with currents in the global climate movement It documents how and why the movement evolved between the Copenhagen Summit of 2009 and the Paris Summit of 2015 altering its strategies and tactics while attracting new actors to the issue area Further it demonstrates how the development of global environmental networks has increased contact between environmental movements in the Global North and those from the Global South resulting in the establishment of climate justice as a political cause and unifying frame for global climate activism

Equality and Non-Discrimination under International Law Stephanie Farrior,2017-07-05 The principles of equality and non discrimination lie at the heart of international human rights law They are the only human rights explicitly included in the UN Charter and they appear at the beginning of virtually every major human rights instrument This volume contains selected works by leading authors on the subject of equality and non discrimination under international law The selections are grouped into four sections The first presents essays that explore theoretical concepts of equality and non discrimination The next addresses the development of international legal standards on the subject The third presents articles analyzing how those standards have been interpreted and applied by UN and regional human rights bodies and the last contains works on what measures besides legal action States are to take to in order to achieve equality and non discrimination
