Triple Bottom Line Reporting in Australia Australian Government - Department of the Environment and Heritage,2003 This guide is intended to support voluntary reporting on environmental performance by organisations in Australia It does not represent a step forward towards regulation of TBL reporting in Australia It aims to provide guidance on selecting suitable environmental indicators simple methodologies which where possible incorporate existing Australian initiatives and enable organisations to determine performance in relation to selected indicators and are consistent with the Global Reporting

Initiative s environmental indicators and links to other resources to assist with preparing TBL reports The Regulation of Medical Products Penny Gleeson,2024-12-31 This book develops a theoretical framework for examining and assessing the regulatory arrangements for medical products Since the first half of the 20th century the regulation of pharmaceuticals medical devices and more recently biologicals have been controlled in many jurisdictions by specific regulatory regimes and agencies Their regulatory mandates are similar to ensure the quality safety and efficacy of medical products This book provides a timely and relevant assessment of the complexities of medical regulatory regimes by drawing on a particular theory of political legitimacy In this respect the book adopts a dialogic approach according to which a shared set of normative beliefs and values are formulated as a theoretical tool to identify deficiencies in the regulatory arrangements for medical products Drawing on several Australian cases studies characterised by divergent normative perspectives the book develops its dialogic approach in order to challenge the usual legitimization of regulatory regimes from the perspective of science alone Specifically it maintains that such regimes need to embrace a normative pluralism that admits a diversity of types and sources of knowledge This evaluation of the increasingly influential domain of medical regulation will appeal to a range of scholars and practitioners working in law public health politics and science and technology studies **Report ...**

Trade, Health, and the Burden of Proof in WTO Law

Joachim Ahman,2011-12-05 Most of us do not immediately think of health protection measures as trade barriers Yet to the trade liberalization interest they are often exactly that hidden protectionism some would say When the conflict between trade and health hardens into a confrontation allocation of the burden of proof becomes the critical factor in determining the outcome And the outcome of such a WTO dispute may affect a very large number of people This important book examines the WTO provisions applicable to health protection measures from a burden of proof perspective with an up to date and thorough analysis of all relevant case law It clearly demonstrates and explains the following and more how burden of proof decisions following from the burden of proof concept as it has developed in national legal systems and in general international law may favour or disfavor different interests the problems that may occur when risk related facts have to be proved how the legal facts in the WTO provisions specifically regulating the adoption of health protection measures have been interpreted in case law and how the burden of proof concept can be used to balance the conflicting interests in ways other than those used so far No other source offers such a comprehensive analysis of WTO provisions applicable to health protection measures This book s burden of proof perspective makes it an especially valuable resource for trade law experts WTO member representatives and interested NGOs seeking to understand and discuss the balancing of health protection and trade liberalization
