Towards a Federal Europe Alexander H. **Passages to Power** Pippa Norris, 1997-10-09 Recruitment to legislative office is one of the core functions of political systems yet we know little about how the process varies from one country to another *Passages to Power* provides a comparative account of legislative recruitment which applies a common analytical framework and new survey data to nineteen advanced democracies Legislative recruitment refers to the critical step as people move from lower levels of politics into parliamentary careers Who succeeds in becoming a politician Who fails And why Based on original research which adopts a new institutionalist perspective this 1997 book compares these issues in a wide range of countries This important study brings together an outstanding group of international scholars to look at recruitment around the world The countries examined in depth include Australia Canada Finland Germany Japan the Netherlands New Zealand the United Kingdom and the United States along with a comparison of all member states in the European Union *On Parties, Party Systems and Democracy* Peter Mair, 2014-09-01 This collection brings together some of the most significant and influential work by leading comparativist Peter Mair 1951 2011 The selection ranges from considerations on the relevance of concept formation to the study of party systems and party organisations and from reflections on the democratic legitimacy of the European Union to the future of party democracy Including frequently cited papers alongside lesser known work the writings collected in this volume attest to the broad scope and depth of Mair's insights into comparative party politics and the changing realities of party government As such they form an important and enduring contribution to the study of politics and a fitting tribute to an inspirational and much missed figure in the global political science community Edited and introduced by Ingrid van Biezen with an intellectual portrait of Peter Mair by Stefano Bartolini and Hans Daalder **Parting at the Crossroads** Antonia Maioni, 2020-11-10 As almost all newspaper or magazine readers know Canada figured prominently in the turbulent U S debates over health care reform in the early Clinton presidency Furthermore future news analysts and policymakers will undoubtedly again use Canada to cite the good and the bad aspects of single payer national health insurance Beyond the debate about the desirability of Canadian style health care reforms Antonia Maioni sees another question Why did the United States and Canada alike in so many ways part at the crossroads to produce such different systems of health insurance She answers this previously neglected query so interestingly that her book will hold the attention of anyone concerned with health care in either country or both The author explores the development of health insurance in the United States and Canada from the emergence of health care as a political issue in the 1930s to the passage of federal health insurance legislation in the 1960s Focusing on how political institutions influence policy development she shows that Canada's federal

structure and its parliamentary institutions encouraged a social democratic third party that became pivotal in demonstrating the feasibility of universal public health insurance Meanwhile the constraints of the U S political system forced health care reformers to temper their own ideas to appeal to a wide coalition within the Democratic party Even readers previously unfamiliar with Canadian politics will find in this book important clues about the realm of the possible in the uncertain future of U S health care

**Are Politics Local?** Scott Morgenstern, 2017-10-12 Are politics local Why Where When How do we measure local versus national politics And what are the effects This book provides answers to these questions within an explicitly comparative framework including both advanced and developing democracies It does so by using a statistically based and graphical account of party nationalization providing methodology and data for legislative elections covering scores of parties across dozens of countries The book divides party nationalization into two dimensions static and dynamic to capture different aspects of localism both with important implications for representation Static nationalization measures the consistency in a party s support across the

country and thus shows whether parties are able to encompass local concerns into their platforms Dynamic nationalization in turn measures the consistency among the districts in over time change in electoral results under the presumption that where districts differ in their electoral responses local factors must drive politics Each of the two dimensions in sum considers representation from the perspective of the mix of national versus local politics
