## **Representations Of Health Illness And Handicap:**

**Representations of Health, Illness and Handicap** Ivana Marková, Robert M. Farr, 1995 The research described provides evidence that work needs to be carried out at the level of the community in bringing about changes in its representations of illness and handicap since it would appear that working only through the mass media of communication is insufficient. **Representations of Health Illness and Handicap** is a unique contribution of Health Psychology and Social Science to an understanding of links between media images, lay representation of health issues and their implications for behaviour.

Over the last decade there has been a significant shift from body to environment and the relation between the two when understanding the phenomenon of disabilities. The current trend is to view disabilities as the outcome of this interaction in short from a biopsychosocial perspective. This has called for research based on frameworks that incorporate both the body and the environment. There is a great corpus of knowledge of the functions of a body and a growing corpus of environmental factors such as perceptions among specific groups of persons towards disabilities. However, there is a lack of knowledge of the perception of disabilities from a general population. This book offers an insight into how we can broaden our understanding of disability by using Social Representations Theory with specific examples from studies on hearing loss. The authors highlight that attitudes and actions are outcomes of a more fundamental disposition, i.e. social representation towards a phenomenon like disability. This book is written assuming the reader has no prior knowledge of Social Representations Theory. It will be of interest to all scholars, students and professionals working in the fields of disability studies, health and social care and sociology. **Healing Insanity: a Study of Igbo Medicine in Contemporary Nigeria** Patrick E. Iroegbu, 2010-06-08 **Healing Insanity: A Study of Igbo Medicine in Contemporary Nigeria** is an original and in-depth study on endogenous medical system in an African society. It is craftily written and provides solid insight through case studies and theory into how insanity affects patients and the society. Particularly, it explores various collective representations and strategies regarding insanity and healing as it examines the healing institutions, healers and ritual cults. The central question is given the patterns of healing, how do the Igbo shape the incidence and symptoms of insanity, define its aetiology and provide healers with culture-specific resources and skills to address this illness. The focus became increasingly centred on bodily semantics and endogenous knowledge systems and practices. Dr Patrick Iroegbu's work is a very valuable and rare study and has appeared at a desirable time. It is for an African society a comprehensive study of the many ways Igbo people in their practical, routine-like attitudes and body-centred experiences as well as in their more reflective aetiological knowledge and healing institutions relate to the phenomenon of

insanity or ara in the cultural parlance As the first of its kind reminiscent of and assured by the various remarks of Igbo scholars and leaders at various meetings and discourses the task this work has set out to accomplish is a very brave one The authors account of his fieldwork experiences and adopted techniques illustrates his initiation revealing him as a genuine ethnographer who is a friend of people and at ease with his field With both the far seeing and inspiring analysis of Igbo medicine life and culture accounted for in the work the book stands out for ethnographers teachers students leaders policymakers and the general public This is a book that deserves to be read as it shapes the critical path toward understanding ways of healing insanity in a culture specific context crosscutting perspectives for a relationship between indigenous healing and the biomedical sphere Prof Ren Devisch Africa Research Centre University of Leuven This book is written with a clear purpose for everyone to read to understand and heal insanity and indeed provides a thick piece of cultural philosophy and vernacular of Igbo medicine in hopes of putting cultural wisdom in pursuit of integral health care development Prof Pantaleon Iroegbu Professor of Philosophy Major Seminary Ekpoma January 2006 To read this book as I did is to get the benefit of Dr Patrick Iroegbus ethnographic insight for an archetypical African healing system in Igboland It offers a fascinating theory of symbolic release that speaks of African symbolic action and knowledge system Dr Paul Komba Esq University of Cambridge

The representation of discrimination in the Harry Potter novels Alena Eikens,2017-06-27 When Joanne K Rowling published her first Harry Potter novel in 1997 probably nobody expected the tremendous success her writing debut was going to bring her The huge popularity of the seven book series led not only to an equally successful series of film adaptations but also to a variety of well selling merchandise Children and adults alike are enchanted by the wizarding world that Rowling so meticulously created However Rowling s story does not only serve as a source for our entertainment she also uses her fantasy world as a metaphor for our own world depicting rights and wrongs in many different fields One of the main themes is even a very controversial one discrimination And Rowling did not just invent

a world in black and white she does not simply tell the reader that prejudice is a reprehensible trait in our society Rather she created a world for the readers to explore and find things out for themselves as the story continued In this paper the author claims that the representation of discrimination in the Harry Potter series influences the readers in a positive way and that they are likely less prejudiced against stigmatised groups after reading the books *Risk and 'The Other'* Hélène Joffé,1999-09-29 From earthquakes to epidemics AIDS to industrial accidents the mass media continually bring into our daily lives the awareness of risk But how do people respond to this increased awareness How do people cope with living in what has been termed the risk society This book attempts to explain how within a given social and cultural context individuals make sense of impending crisis In particular it tries to explain the phenomenon of a widespread sense of personal invulnerability when faced with risk the not me factor Using a social psychological framework it highlights emotional factors which are a key component of responses to risk but have hitherto been neglected due to the tendency of much work on risk to concentrate almost exclusively on cognitive processing This book will appeal to an international audience of post graduates academics and researchers in the areas of risk psychology sociology medical anthropology and psychoanalytic studies The Disabled Joan Nordquist,1997
