Evans, 2017-05-24 The first truly interdisciplinary analysis to link Douglas Sirk's striking visual aesthetic to key movements in twentieth century art and architecture this book reveals how the exaggerated artifice of Sirk's formal style emerged from his detailed understanding of the artistic debates that raged in 1920s Europe and the post war United States With detailed case studies of *Final Chord* and *All That Heaven Allows* Victoria Evans demonstrates how Sirk attempted to dissolve the boundaries of cinema by assimilating elements of avant garde art architecture and design into the colour composition and setting of many of his most well known films Treating Sirk's oeuvre as a continuum between his German and American periods Evans argues that his mise en scene was the result of an interdisciplinary transnational dialogue and illuminates the broader cultural context in which his films appeared by establishing links between archival documents Modernist manifestos and the philosophical writings of his peers

**Culture, Urbanism and Planning** Manuel Guardia, 2016-05-13 The relationship between culture and urbanism has been the focus of much discussion and debate in recent years While globalisation tends towards a homogeneity successful global cities have a strong individual and particularly cultural identity The economic value of the culture of cities lies not only in the arts taking place there but also in the city's fabric its architecture and in its cultural heritage This volume brings together a team of leading specialists to examine the policies of image and city marketing which have developed over the past 15 years and whether these are a continuity of earlier strategies Featuring case studies which illustrate diverse perspectives on linking culture urbanism and history the book reviews heritage and planning culture looking at the experience of urbanism in the Old Historic City The book also assesses the increasingly important issue of urban images and their influence on planning strategies

**Alternative Visions of Post-War Reconstruction** John Pendlebury, Erdem Erten, Larkham J Peter, 2014-08-19 The history of post Second World War reconstruction has recently become an important field of research around the world Alternative Visions of Post War Reconstruction is a provocative work that questions the orthodoxies of twentieth century design history This book provides a key critical statement on mid twentieth century urban design and city planning focused principally upon the period between the start of the Second World War to the mid sixties The various figures and currents covered here represent a largely overlooked field within the history of 20th century urbanism In this period while certain modernist practices assumed an institutional role for post war reconstruction and flourished into the mainstream such practices also faced opposition and criticism leading to the production of alternative visions and strategies Spanning from a historically informed modernism to the increasing presence of urban conservation the

contributors examine these alternative approaches to the city and its architecture

**Excavating Modernity** Joshua Arthurs, 2013-09-20 The cultural and material legacies of the Roman Republic and Empire in evidence throughout Rome have made it the Eternal City Too often however this patrimony has caused Rome to be seen as static and antique insulated from the transformations of the modern world In *Excavating Modernity* Joshua Arthurs dramatically revises this perception arguing that as both place and idea Rome was strongly shaped by a radical vision of modernity imposed by Mussolini's regime between the two world wars Italian Fascism's appropriation of the Roman past the idea of *Romanità* encapsulated the Fascist virtues of discipline hierarchy and order the Fascist new man was modeled on the Roman legionary the epitome of the virile citizen soldier This vision of modernity also transcended Italy's borders with the Roman Empire providing a foundation for Fascism's own vision of Mediterranean domination and a European New Order At the same time *Romanità* also served as a vocabulary of anxiety about modernity Fears of population decline racial degeneration and revolution were mapped onto the barbarian invasions and the fall of Rome Offering a critical assessment of *Romanità* and its effects Arthurs explores the ways in which academics officials and ideologues approached Rome not as a site of distant glories but as a blueprint for contemporary life a source of dynamic values to shape the present and future

**Gunnar Asplund's Gothenburg** Nicholas Adams, 2014-10-08 In the west coast port city of Gothenburg Sweden the architect Gunnar Asplund built a modest extension to an old courthouse on the main square 1934-36 Judged today to be one of the finest works of modern architecture the courthouse extension was immediately the object of a negative newspaper campaign led by one of the most noted editors of the day Torngny Segerstedt Famous for his determined opposition to National Socialism he also took a principled stand against the undermining of urban tradition in Gothenburg Gothenburg's problems with modern public architecture though clamorous and publicized throughout Sweden were by no means unique In *Gunnar Asplund's Gothenburg* Nicholas Adams places Asplund's building in the wider context of public architecture between the wars setting the originality and sensitivity of Asplund's conception against the political and architectural struggles of the 1930s Today looking at the building in the broadest of contexts we can appreciate the richness of this exquisite work of architecture This book recaptures the complex magic of its creation and the fascinating controversy of its completed form

overview of the state of contemporary urban design in the Arab World this book conceptualizes the field under four major perspectives urban design as discourse as discipline as research and as practice It poses two questions How can such a diversity of practice be positioned with regard to current international trends in urban design Also what constitutes the specificity of the Middle Eastern experience in light of the regional political and cultural settings This book is about urban designers on the margins how they narrate their cities how they engage with their discipline and how they negotiate their distance from and with respect to global disciplinary trends As such the term margins implies three complementary connotations on the global level it invites speculation on the way contemporary urban design is being impacted by the new conceptualizations of center periphery originating from the post colonial discourse on the regional level it is a speculation on the specificity of urban design thinking and practice within a particular geographical and cultural context here the Arab World and finally on the local level it is an a
