capable of explaining the behavioral phenomena under consideration COPY FOR ZILLMANN MAILER Zillmann examines issues such as sexual access through aggression the involvement of agonistic behavior within sexuality sex aggression fusion the consequences of anticipatory imagination concerning sexuality and aspects of libido loss due to excitatory habituation This book also traces connection between sexuality and aggression in nonhuman species especially in nonhuman primates subjects human behavior to comparative and evolutionary analysis examines connectedness in neurological and endocrinological terms details both central and autonomic commonalities between sexual and aggressive behaviors outlines sexual dimorphism and chromosomal endocrine aberrations pays special attention to adrenal commonalities in sexual and aggressive behaviors and the fusion of these behaviors and examines aggressive sexual connectedness in the analysis of motivation and emotion Zillmann finally proposes new explanations for the numerous documented associations between sexuality and aggression These proposals combine biological neuroendocrine autonomic and cognitive aspects of aggressive and sexual behaviors A trichotomy of excitatory interdependencies is developed for fight flight and coition In the nomenclature of emotion this trichotomy concerns the interdependencies between aggressiveness fear and sexual impulsion A considerable amount of research evidence is aggregated in support of these interdependencies The author ultimately examines the exploitation of the existing connections between sexual and aggressive behaviors especially the exploitation that serves the enhancement of sexual pleasure In this context he arrives at novel and perhaps distressing characterizations of sexual coercion However he also explores sexual boredom and discusses remedies in the framework of his theorizing Last but not least sexual aggression and sexual and aggressive behaviors independently are placed into an evolutionary context Recognition and acknowledgment of the archaic nature of many aspects of sexual and aggressive behaviors in contrast to the comparatively vernal development of behavior guiding contemplation leads him to a unique and provocative proposal of the function of aggression in the realm of sexuality
