*Toxicology of Male Reproduction* James C. Lamb, Paul M. D. Foster, 2013-10-22 Physiology and Toxicology of Male Reproduction is a collection of papers that deals with general reproductive biology and specific aspects of reproductive toxicology pertaining to the male sex. Some papers discuss testicular organization, reproductive toxicity testing systems, and germ cell genetic toxicology. The use of in vitro systems by investigators to dissect the male reproductive toxicants can lead to a more scientific approach toward hazard assessment and the development of safer drugs and chemicals. Other papers explain the fundamental reproductive biology of the testis, the neuroendocrine system, the epididymis, and accessory sex organs and spermatozoal evaluation. Toxicological aspects cover the toxicological evaluation of the complete reproductive system, testicular morphology, sperm assessment, and germ cell mutagenesis. One paper describes alternative methods in toxicology by using new in vitro systems that should reduce or eliminate the need for tests conducted on animals. In vitro methodology embraces other systems such as from subcellular fractions to isolated intact organs. In relation to target organ toxicity, the researcher can focus using primary cell cultures. This collection will prove helpful to toxicologists, graduate students, and researchers in biology, particularly in male reproductive toxicology and fertility testing. **The Infertility Trap**

R. John Aitken, 2022-05-05 A potential crisis in human fertility is brewing. As societies become more affluent, they experience changes that have a dramatic impact on reproduction. As average family sizes fall, the selection pressure for high fertility genes decreases, exacerbated by the IVF industry which allows infertility-linked genes to pass into the next generation. Male fertility rates are low for many reasons, including genetics and exposure to environmental toxins. So a perfect storm of factors is contriving to drive fertility rates down at unprecedented rates. If we do not recognize the reality of our situation and react accordingly, an uncontrollable decline in population numbers is likely, which we will be unable to reverse. This book will address in a unique and multi-faceted way how the consequences of modern life affect fertility so that we can consider behavioural, social, medical, and environmental changes which could reduce the severity of what is about to come. Infertility, Medical and Social Choices, 1988 Policy issues and options for congressional action. Introduction. Demographic of infertility factors contributing to infertility. Prevention of infertility. Diagnosis of infertility. Treatment of infertility. Infertility services and cost. Quality assurance for research and clinical care. Reproductive health of veterans. Ethical considerations. Constitutional considerations. Legal considerations. Artificial insemination. In vitro fertilization. Embryo transfer and gamete intrafallopian transfer. Legal consideration surrogate motherhood. Frontiers of reproductive technology. **Infertility in the Modern World**

Gillian R. Bentley, C. G. Nicholas Mascie-Taylor, 2000-11-30 An interdisciplinary perspective on the ways in which human biology and culture can affect fertility. Toxicology Principles for the Industrial Hygienist William E. Luttrell, Warren W. Jederberg, Kenneth R. Still, 2008 Focuses on the applications of toxicology principles to the practice of industrial hygiene using case studies as examples. **Male Infertility - E-Book** Ashok Agarwal, Florence Boitrelle, Panagiotis Drakopoulos, Hassan Nooman Sallam, Ramadan Saleh, 2023-11-29 Despite the fact that about half of

infertility problems stem from male factors gynecologists are often the first health care providers to perform the initial assessment of the infertile couple For this reason it is critical that gynecologists and reproductive medicine specialists remain up to date on the primary conditions that cause male infertility as well as current diagnostic tools and treatment options of both natural and assisted conception From diagnosis through treatment Male Infertility Management of Infertile Men in Reproductive Medicine offers expert straightforward guidance on the pathophysiology and management of male infertility for clinicians who assist couples early in the process of trying to conceive Covers diagnostic aspects of male infertility clinical laboratory and imaging methods as well as various therapeutic options including classical and advanced surgical procedures Discusses intrauterine insemination conventional in vitro fertilization intracytoplasmic sperm injection sperm cryopreservation preimplantation genetic testing and more Begins each chapter with key points and ends with clinical scenarios of real life problems and their solutions Shares the knowledge and expertise of global experts in the field Any additional digital ancillary content may publish up to 6 weeks following the publication date *Infertility* Marcelle Cedars,2005-04-13 An authoritative clinical decision making guide to the assessment and treatment of the infertile patient Addresses the importance of an accurate and effective patient evaluation of both female and male patients Includes recurrent pregnancy loss state of the art reproductive technologies environmental causes psychological aspects the role of alternative medicine in infertility and more **Strategy for Environmental Health Research at EPA** Lawrence W.
