Republic At Risk:

Republic at Risk Walter J. Stone, James A. McCann, 2021-06-03 When people have the freedom to further their own personal interests in politics the results may be disastrous Chaos Tyranny Can a political system be set up to avoid these pitfalls while still granting citizens and politicians the freedom to pursue their interests Republic at Risk is a concise and engaging introduction to American politics The guiding theme is the problem of self interest in politics which James Madison took as his starting point in his defense of representative government in Federalist 10 and 51 Madison believed that unchecked self interest in politics was a risk to a well ordered and free society But he also held that political institutions could be designed to harness self interest for the greater good Putting Madison s theory to the test the authors examine modern challenges to the integrity and effectiveness of US policy making institutions inviting readers to determine how best to respond to these risks

Developments in Financial Supervision and the Use of Macroprudential Measures in Central America Mr. Fernando L. Delgado, Mr. Mynor Meza, 2011-12-01

Improvements in financial regulation and supervision in the Central American region (CAPDR) have strengthened financial stability. Prudential instruments with potential macroeconomic effects have been introduced. Nonetheless, compared with the larger Latin American and selected industrial countries, there is still an important scope for CAPDR to enhance financial supervision and regulation. Based on two surveys and the analysis of the Basel Core Principles, the paper determines that some weaknesses exist in risk-based supervision and that macroprudential measures have scarcely been deployed.

The Vulnerability of Cities Mark Pelling, 2012-06-25

When disaster strikes in cities, the effects can be catastrophic compared to other environments. But what factors actually determine the vulnerability or resilience of cities? *The Vulnerability of Cities* fills a vital gap in disaster studies by examining the too often overlooked impact of disasters on cities, the conditions leading to high losses from urban disasters and why some households and communities withstand disaster more effectively than others. Mark Pelling takes a fresh look at the literature on disasters and urbanization in light of recent catastrophes. He presents three detailed studies of cities in the global South drawn from countries with contrasting political and developmental contexts: Bridgetown, Barbados, a liberal democracy; Georgetown, Guyana, a post-socialist state; and Santo Domingo, Dominican Republic, an authoritarian state in democratic transition. This book demonstrates that strengthening local capacity through appropriate housing, disaster preparedness, infrastructure and livelihoods is crucial to improving civic resilience to disasters. Equally important are strong partnerships between local community-based organizations, external non-governmental and governmental organizations, public and private sectors and between city and national government. The author highlights and discusses these best practices for handling urban disasters. With rapid urbanization across the globe, this book is a must-read for professionals, policy makers, students and researchers in disaster management, urban development and planning, transport, planning, architecture, social studies and earth sciences.
