Research Designs For Political Science Contrivance And Demonstration In Theory And Practice:

Research Designs for Political Science David A. Bositis, 1990 Research design in political science has become too technical mechanical and uninvolved argues David A Bositis as he explains the need for an alternative design regimen that provides the means for real engagement in empirical research Bositis view offers a theoretical imaginative manipulative and engaging alternative approach to political science research His text is divided into three main parts Part 1 Epistemological Issues in the Design of Research introduces the work s themes and context Included in this discussion are research design as persuasive strategy a critique of survey research and a theory of contrivance and demonstration in design In part 2 Contrivance and Demonstration in Practice Bositis examines the practice of design in political science first through a discussion of the history of experimentation and then through an examination of both an integrated design and participant observation approach Part 3 The Politics of Research Design offers an analysis of the politics and ethics that inform design choices An extensive bibliography of nearly 400 entries is one of the most complete listings of experiments in political science to be found anywhere

Research Designs for Political Science R. K. Rathod, 2017 **Foreign Intervention, Warfare and Civil Wars** Adam Lockyer, 2017-09-01 This book examines the impact of foreign intervention in the course and nature of warfare in civil wars Throughout history foreign intervention in civil wars has been the rule rather than the exception The involvement of outside powers can have a dramatic impact on the course and nature of internal conflicts Despite this there has been little research which has sought to explain how foreign intervention influences the course of civil wars This book seeks to rectify this gap It examines the impact of foreign intervention on the warfare that characterises civil wars through by studying the cases of the Angolan and Afghan civil wars It investigates how foreign resources affect the military power of the recipient belligerent and examines how changes in the balance of capabilities influence the form of warfare that characterises a civil war Warfare in civil wars is often highly fluid with belligerents adapting their respective strategies in response to shifts in the balance of military capabilities This book shows how the intervention of foreign powers can manipulate the balance of capabilities between the civil war belligerents and change the dominant form of warfare The findings presented in this book offer key insights for policy makers to navigate the increasing internationalization of civil wars around the globe This book will be of much interest to students of civil wars intra state conflict war and conflict studies and security studies

Power, Politics, Law: International Law and State Behaviour During International Crises Radhika Withana, 2008-07-31 This volume addresses the question as to where international law fits into the making and implementation of foreign policy during an international crisis in which a State is considering and or may actually use force Empirical literature on the law State behaviour relationship during international crises has not been able to answer this question adequately The limitations of existing empirical literature are identified as stemming from the limitations of existing positivist realist and functionalist theoretical explanations of the law State behaviour relationship These theoretical

approaches which underpin existing empirical literature on international crises assume that international law matches what is referred to in this book as its rule book image This is the notion of international law as a finite set of objective politically neutral rules that can be applied so as to distinguish objectively between legal and illegal action The rule book image of international law does not match reality but the assumption that it is true underpins both theoretical literature and references to international law in political rhetoric The rule book image and the reality of international law have been reconciled within the theory of International law as Ideology ILI as developed by Shirley Scott This book hypothesises that an ILI perspective offers a better explanation of the law State behaviour relationship during international crises than rival explanations grounded in positivism realism or functionalism Four case studies of State behaviour of the US the Soviet Union and the PRC during the Korean War 1950 1953 of the US and UK during the Suez crisis 1956 of the US and the Soviet Union during the Cuban Missile Crisis 1962 and of the US and an alliance of Latin American States during the Dominican Republic crisis 1965 are used to test the hypothesis The findings confirm the greater explanatory efficacy of ILI and demonstrate that the significance of international law to foreign policy decision making during international crises is more than that of deterring the use of force as is assumed by rival theoretical approaches grounded in a rule book image of international law International law is shown to serve as a vehicle for inter State competition during international crises

Mediating International Crises Jonathan Wilkenfeld, Kathleen Young, David Quinn, Victor Asal, 2007-05-07 This book investigates the crisis management mechanism mediation by third parties to determine the effectiveness of mediation efforts in crisis negotiations

Global Indigenous Politics Sheryl Lightfoot, 2016-05-20 This book examines how Indigenous peoples rights and Indigenous rights movements represent an important and often overlooked shift in international politics a shift that powerful states are actively resisting in a multitude of ways While Indigenous peoples are often dismissed as marginal non state actors this book argues that far from insignificant global Indigenous politics is potentially forging major changes in the international system as the implementation of Indigenous peoples rights requires a complete re thinking and re ordering of sovereignty territoriality liberalism and human rights After thirty years of intense effort the transnational Indigenous rights movement achieved passage of the UN Declaration on the Rights of Indigenous Peoples in September 2007 This book asks Why did movement need to fight so hard to secure passage of a bare minimum standard on Indigenous rights Why is it that certain states are so threatened by an emerging international Indigenous rights regime How does the emerging Indigenous rights regime change the international status quo The questions are addressed by exploring how Indigenous politics at the global level compels a new direction of thought in IR by challenging some of its fundamental tenets It is argued that global Indigenous politics is a perspective of IR that with the recognition of Indigenous peoples collective rights to land and self determination complicates the structure of international politics in new and important ways challenging both Westphalian notions of state sovereignty and the neo liberal foundations of states and the international human rights consensus

Qualitative case studies of Canadian and New Zealand Indigenous rights based on original field research analyse both the potential and the limits of these challenges This work will be of interest to graduates and scholars in international relations Indigenous studies international organizations IR theory and social movements
