*The Archive Project* Niamh Moore, Andrea Salter, Liz Stanley, Maria Tamboukou, 2016-07-28 Recent scholarship on archival research has raised questions concerning the character and impact of the archive on how the traces of the past are researched the use and analysis of different kinds of archived data methodological approaches to the practicalities involved and what kind of theory is drawn on and contributed to by such research The Archive Project Archival Research in the Social Sciences builds on these questions exploring key methodological ideas and debates and engaging in detail with a wide range of archival projects and practices in order to put to use important theoretical ideas that shed light on the methods involved Offering an overview of the current state of the field and written by four authors with extensive experience in conducting research in and creating archives around the world it demonstrates the different ways in which archival methodology practice and theory can be employed It also shows how the ideas and approaches detailed in the book can be put into practice by other researchers working on different kinds of archives and collections The volume engages with crucial questions including What is an archive and how does it come into existence Why do archival research and how is it done How can sense be made of the scale and scope of collections and archives What are the best ways to analyse the traces of the past that remain What are helpful criteria for evaluating the knowledge claims produced by archival research What is the importance of community archives How has the digital turn changed the way in which archival research is carried out What role is played by the questions that researchers bring into an archive How do we deal with unexpected encounters in the archive A rigorous and accessible examination of the methods and choices that shape research on the ground and the ways in which theory practice and methodology inform one another this book will appeal to scholars across the social sciences and humanities with interests in archival and documentary research

**Working in the Archives** Alexis E. Ramsey, Wendy B Sharer, Barbara L'Eplattenier, Lisa Mastrangelo- Do Not Use, 2009-12-14 Archival research of any magnitude can be daunting With this in mind Alexis E Ramsey Wendy B Sharer Barbara L Eplattenier and Lisa Mastrangelo have developed an indispensable volume for the first time researcher as well as the seasoned scholar Working in the Archives is a guide to the world of rhetoric and composition archives from locating an archival source and its materials to establishing one's own collection of archival materials This practical volume provides insightful information on a variety of helpful topics such as basic archival theory processes and principles the use of hidden or digital archives the intricacies of searching for and using letters and photographs strategies for addressing the dilemmas of archival organization without damaging the provenance of materials the benefits of seeking sources outside academia and the difficult yet often rewarding aspects of research on the Internet Working in the Archives moves beyond the basics to discuss the more personal and emotional aspects of archival work through the inclusion of interviews with experienced researchers such as Lyn e Lewis Gaillet Peter Mortensen Kathryn Fitzgerald Kenneth Lindblom and David Gold Each shares his or her personal stories of the joys and challenges that face

today's researchers Packed with useful recommendations this volume draws on the knowledge and experiences of experts to present a well rounded guidebook to the often winding paths of academic archival investigation These in depth yet user friendly essays provide crucial answers to the myriad questions facing both fledgling and practiced researchers making Working in the Archives an essential resource *The Archive Project* Niamh Moore, Taylor & Francis Group, Andrea Salter, Liz Stanley, Maria Tamboukou, 2020-07 Recent scholarship on archival research has raised questions concerning the character and impact of the archive on how the traces of the past are researched the use and analysis of different kinds of archived data methodological approaches to the practicalities involved and what kind of theory is drawn on and contributed to by such research The Archive Project Archival Research in the Social Sciences builds on these questions exploring key methodological ideas and debates and engaging in detail with a wide range of archival projects and practices in order to put to use important theoretical ideas that shed light on the methods involved Offering an overview of the current state of the field and written by four authors with extensive experience in conducting research in and creating archives around the world it demonstrates the different ways in which archival methodology practice and theory can be employed It also shows how the ideas and approaches detailed in the book can be put into practice by other researchers working on different kinds of archives and collections The volume engages with crucial questions including What is an archive and how does it come into existence Why do archival research and how is it done How can sense be made of the scale and scope of collections and archives What are the best ways to analyse the traces of the past that remain What are helpful criteria for evaluating the knowledge claims produced by archival research What is the importance of community archives How has the digital turn changed the way in which archival research is carried out What role is played by the questions that researchers bring into an archive How do we deal with unexpected encounters in the archive A rigorous and accessible examination of the methods and choices that shape research on the ground and the ways in which theory practice and methodology inform one another this book will appeal to scholars across the social sciences and humanities with interests in archival and documentary research *Historical Research in Archives* Samuel J. Redman, 2013 An aid to researchers working in 21st century archives in the United States this pamphlet presents some contemporary approaches to archival research from tracking down possible archival sources to the nuts and bolts of recording information It also offers tips for organizing archival material and utilizing new technologies in the archives *Research in Archives* Philip Coolidge Brooks, 1969 **Archival Strategies and Techniques** Michael R. Hill, 1993-09-28 I think that anyone who has an interest in traditional archival research will find this a thoughtful and valuable guide to the many different elements of the research process Theory and Methods His research advice is systematic and thorough and could easily serve for other researchers than sociobiographers In eighty eight pages Hill has managed to pack not only this sound research advice but a critique of archival practices and a six page bibliography The book is certainly worth a read and could give archivists an opportunity to broaden their sociological horizons Archivaria

Michael Hill's monograph *Archival Strategies and Techniques* depicts a world that some might think would be as dusty as old manuscripts themselves but in the process of describing the excitement, joys, frustrations, and ethical conundrums he has demonstrated that the archival scholar can share thrills and fears with Indiana Jones. Hill's book is filled with lively anecdote, compelling analysis, and a full measure of wit. This monograph will be an invaluable companion for anyone planning to spend time in libraries, dusty or otherwise. Gary Alan Fine, University of Georgia. Much more than a how-to book, Michael Hill interprets archives and their use from a Goffmanian sociological perspective. As an extra benefit, he guides readers through the archival process by drawing on a sociological historical project: the recovery of unknown or presently discounted social scientists. Any teacher who assigns a term paper to students will want to recommend this book. Shulamit Reinharz, Brandeis University. Michael Hill has produced a lively and for some of us comforting guide to archival research in sociology. The book is comforting because among the gems contained within this short monograph is a discussion of the need to recover unknown or presently discounted social scientists as an important epistemological task. Network Historical and biographical research is increasingly used by social scientists as an important form of qualitative research. This kind of research usually requires the extensive use of formal archives housed in university and government buildings, museums, and other institutions. This concise but practical book provides the rules of the game for the novice on conducting and preparing to work in archives: the protocol of using archives and ways of organizing and referencing the useful data from the archive. This intriguing volume will interest scholars and students from a wide array of disciplines using this type of research for social analysis. **New Directions in Archival Research** Margaret Procter, Christopher Piers Lewis, 2000 **The MARC Format and Life Cycle Tracking at the National Archives** United States. National Archives and Records Administration. Archival Research and Evaluation Staff, United States. Archival Research and Evaluation Staff, 1986 [Landmark Essays on Archival Research](#) Lynée Lewis Gaillet, Diana Eidson, Don Gammill (Jr.), 2016 This collection offers essays from more than twenty years of archival research methodologies and methods. The selection of essays found within presented chronologically bring forward the theories and practices that define this essential form of scholarly inquiry. They allow readers to get a sense of how scholars have articulated archival research, giving them insight into the shifts research methods have undergone given emerging technologies, changing notions of access, emerging concerns about issues of positionality and representation, fluid definitions of what constitutes an archive, and the place of archival research in hybrid research methods. **Beyond the Archives** Gesa E Kirsch, Liz Rohan, 2008-04-03 *Beyond the Archives: Research as a Lived Process* presents highly readable narratives that demystify and illuminate the research process by showing how personal experiences, family history, and scholarly research intersect. Editors Gesa E Kirsch and Liz Rohan emphasize how important it is for researchers to tap into their passions, pursuing research subjects that attract their attention with creativity and intuition without limiting themselves to traditional archival sources and research methods. Eighteen contributors from a number of disciplines detail inspiring

research opportunities that led to recently published works while offering insights on such topics as starting and finishing research projects using a wide range of types of sources and methods and taking advantage of unexpected leads chance encounters and simple clues In addition the narratives trace the importance of place in archival research the parallels between the lives of research subjects and researchers and explore archives as sites that resurrect personal cultural and historical memory

**Doing Archival Research in Political Science** Scott A. Frisch, Dr Douglas B Harris, Sean Q Kelly, 2014-05-14 Given the dearth of training in archival research the editors envisioned a book that addresses the how to of archival research by involving the perspective of archivists The editors identified chapter authors who demonstrate in their research oriented essays how archival research influences and improves empirical political science research They weave their scholarly contributions together with their practical experiences and boots on the ground advice to ease readers toward their first foray into the archives Because archives were largely abandoned by political scientists in the 1950s archivists understanding of their collections and their archival practices is heavily influenced by the habits and methodological concerns of historians The essays in this volume help archivists better understand the somewhat unique perspectives and habits political scientists bring to archival collections This volume challenges archivists to think outside the box of the conventions of history and reconsider their collections from the perspective of the political scientist This first of its kind book traversing political science and library and information science challenges political scientists reliance on easy data promising in return better data The editors propose that the archival record is replete with data that are often superior to current available public data both quantitative and qualitative Substantive chapters in Doing Archival Research in Political Science illustrate how archival data improve understanding across the array of subfields in American politics It also challenges archivists to rethink their collections through the prism of political science Doing Archival Research in Political Science holds tremendous cross disciplinary

appeal Students and faculty in political science are exposed to a fertile but underutilized source of empirical data Political scientists will benefit from the methodological perspectives the practical advice about doing archival work and the concrete examples of archives based research across the subfields in American politics e g congressional studies presidential studies public opinion national security interest groups and public policy Students and faculty in library and archival studies will benefit greatly from the candid discussion of the unique theoretical and methodological concerns inherent in political science improving their ability to reach out and promote their collections to political scientists Examples of archives based political science research will help library faculty better understand how their collections are being utilized by users Building an Electronic Records Archive at the National Archives and Records Administration National Research Council, Computer Science and Telecommunications Board, Committee on Digital Archiving and the National Archives and Records Administration, 2005-06-28 The federal government generates and increasingly saves a large and growing fraction of its records in electronic form In 1998 the National Archives and Record Administration NARA launched its Electronic Archives ERA program to create a system to preserve and provide access to federal electronic records To assist in this project NARA asked the NRC to conduct a two phase study to provide advice as it develops the ERA program The first two reports phase one provided recommendations on design engineering and related issues facing the program This report phase two focuses on longer term more strategic issues including technology trends that will shape the ERA system archival processes of the ERA and future evolution of the system It also provides an assessment of technical and design issues associated with record integrity and authenticity **Research, Records and Responsibility** Amanda Harris, Nick Thieberger, Linda Barwick, 2015-10-02 The Pacific and Regional Archive for Digital Sources in Endangered Cultures PARADISEC has been on the cutting edge of digital archiving building a significant historical collection and community of practice engaged in the preservation and accessibility of research materials Over the ten years of PARADISEC s operation the repository has grown to represent over 860 languages from across the world including cultural materials from the Pacific region and South East Asia North America Africa and Europe With over 5000 hours of audio the extent of the archival material as well as the inclusion of a variety of styles such as songs narratives and elicitation has resulted in an invaluable resource for researchers and communities alike PARADISEC s innovation in archival practice allows communities to access original recordings of their own cultural heritage and provides fieldworkers with a wealth of primary material Research Records and Responsibility explores developments in collaborative archiving practice between archives and the communities they serve and represent incorporating case studies of historical recordings visual data and material culture It brings together the work of Australian and international scholars commemorating ten years of PARADISEC and reflects on the development of research and language archiving *Thirty-five Years of Luther Research* Johann Michael Reu, 1917 **ICICKM2010-Proceedings of the 7th International Conference on Intellectual Capital, knowledge Management and Organisational Learning**
