Research In Philosophy And Technology Vol 8 Research In Philosophy And Technology:

Critical Rationalism, the Social Sciences and the Humanities I.C. Jarvie, N. Laor, 2013-06-29 An outstanding feature of this book is the broad range of the contributors drawn from Europe the Middle East and North America testifying both to the range of Professor Agassi's interests and the geographical spread of his influence Most contributors use Agassi's ideas as a springboard to engage in debate on issues or offer a contribution in an area that interests him In this volume contributors consider such questions as Agassi's philosophy of education in practice as well as in theory the impact of psychologism in philosophy the origins of critical rationalism in the Bible the debates in economics stimulated by the work of Popper and Agassi and many other topics Besides the special topics the reader gains some sense of the fruitfulness of critical rationalism in the hands of Agassi's friends and colleagues

Technology and Contemporary Life P.T. Durbin, 2012-12-06 Nearly everyone agrees that life has changed in our technological society whether the contrast is with earlier stages in Western culture or with non Western cultures Modernization is just one of various terms that have been applied to the process by which we have arrived at the peculiar lifestyle typical of our age whatever the term for the process almost all analysts agree in finding technology to be one of its key ingredients This is the judgment of critics of all sorts anthropologists historians literary figures sociologists theologians Volume 4 in the Philosophy and Technology series brings the perspectives of philosophers to bear on the issue of characterizing contemporary life mainly in high technology societies Some of the philosophers look at the issue directly Others focus on work life or on the living arrangements that surround or condition or offer refuge from work life in technological society Still others reflect on particular technologies especially biotechnology and computer technology that are increasingly affecting both work and family life There is also a paper on the nature of thinking in technological praxis along with two papers on whether it is appropriate to export this sort of thinking to Third World countries and another paper on the issue of responsibility in technology which would have fit better in volume 3 of the series entitled Technology and Responsibility 1987 Finally volume 4 closes with a broad ranging bibliography that takes work and technology as its focus

A Technology for the 'Base of the Pyramid' Dimitris Drisis, 2012-04-27 A reader on Plant Biotechnology can see most of the publications rotating and repeating the issues around Food Safety Regulatory and Public Policy and the role of capital in their support and development The originality of this work stems from the view that looks Plant Biotechnology in an optimistic manner and through the spectrum of an old social theory where science and public interest coexist in a harmonious way It is informative on the social role of Agricultural Technology to feed the world but also provides to scientists and managers in the industry an applied way to solve ethical dilemmas with the introduction of a new technology

Conceptualizing Technological Change Govindan Parayil, 2002 Technological change has been rightfully identified as the single most important factor for improving material well being Yet despite its centrality in our lives we seem to know very little about technology and how it develops and changes both spatially and temporally In this original and

thoughtful book Govindan Parayil draws together current scholarship from disciplines ranging from history to economics to sociology as he develops a cohesive theory of technological change Drawing on a detailed case study of the Green Revolution in Indian agriculture Parayil convincingly argues that technological change is contingent upon the social historical process of knowledge change Thus he explores the policy implications of analyzing technological change as a problem solving activity An innovative contribution to the literature on technological change this ambitious book will also be valuable for those interested in such practical applications as understanding the process of technology transfer

Postphenomenology Evan Selinger, 2006-07-06 Critically engages the work of the philosopher Don Ihde

Through the Screen Francesco Striano, 2024-12-30 When Alice steps through the mirror in Lewis Carroll's Alice's Adventures in Wonderland she removes herself from the centre of vision and perspective restoring the autonomy of everything else that lies beyond the mirror Similarly the philosopher who wishes to engage with the contemporary medial system must pass through the screen recognising the autonomy of the non human components of the system but also understanding the human role within the system itself Perched between philosophy and other disciplines such as psychology sociology neuroscience computer science electronics cultural studies French médiologie German Medienarchäologie and first order cybernetics this book challenges our contemporary screen experience and provides the reader with new tools with which to understand it as well as novel insights into the role of philosophy in the digital condition Its aim ultimately is to lay the foundations of a general theory of being and culture by examining them through their technological manifestations

Technology and Isolation Clive Lawson, 2017-03-30 Combining classic philosophical ideas with groundbreaking recent developments in ontology Lawson proposes a new ontology of technology spanning several disciplines

Technology and Responsibility P.T. Durbin, 2013-03-09 Since it may seem strange for a new series to begin with volume 3 a word of explanation is in order The series Philosophy and Technology inaugurated in this form with this volume is the official publication of the Society for Philosophy the one requirement is that the scholarship be sound and all contributions to the series are subject to rigorous blind refereeing Technology the other half of the philosophy and technology pairing is also construed broadly
