Studies in Higher Education University of Minnesota. Committee on Educational Research, 1943* Studies in Higher Education was first published in 1943. Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions. During this period the Committee on Educational Research devoted its resources primarily to two university wide studies: those concerned with faculty services and with the curriculum. The teaching load investigation formed the basis for establishing a sensible teaching load and provided a comprehensive analysis of the manifold activities for which the faculty and administrative staff are responsible. Collective Goods and Higher Education Research Roger Benjamin, 2018-09-19. With this volume the author demonstrates how a collective goods approach to higher education research can alleviate problems of rising costs, declining resources, and growing concerns about undergraduate learning. In taking this approach the author presents new tools of analysis borrowed from cognitive science, economics, data analytics, education technology, and measurement science to investigate higher education's place in society as a public or private good. By showing how these tools can be utilized to re-orient current research, this volume offers scholars and policy makers an argument for the large scale use of scientific and economic approaches to higher education's most pressing issues.
