European Equity Carve-Outs Nikolas Pojezny, 2007-10-24 Over the past two decades equity carve outs ECOs have become an increasingly popular form of corporate restructuring in Europe Individual business segments are separated from the parent conglomerate company and a minority stake is listed on the stock exchange The parent company thus retains economic control over the subsidiary while simultaneously creating more transparency for capital markets restructuring its investment portfolio and creating the option to either reintegrate or completely sell off the subsidiary at a later stage The attractiveness of ECOs as research objects is largely due to their dualistic nature as both means of parent company financing and corporate restructuring While comprehensive academic literature on ECOs already exists studies mainly focus on the US market The objective of the present study is to conduct corresponding analyses using a European sample allowing the examination of both research issues on an intra European level and of the admissibility of analogies between US and European results

Esteban C. Buljevich, Yoon S. Park, 2007-08-27 Since the 1970s the practice of financing major private and public sector capital intensive projects has shifted to an ever greater reliance on private funding sources as opposed to direct financing through the issuance of corporate or government bonds In the 1990s these financing practices have undergone further changes with the increasing globalization of capital markets the growth of derivative instruments and the rapid increase in information technology that enhances cash management practices Today's project financing market is increasingly using

sophisticated capital market bank and agency financing mechanisms as well as using derivative instruments for asset and liability management. Thus financial market innovations are bringing the once separate fields of project financing and international finance more closely together. This is the first book to treat both topics as an interrelated whole for contemporary project financing cannot be fully understood without a good working knowledge of the international financial markets that have developed the various financing techniques and funding sources being used. The book provides an in depth description of cross border project financing as a technique for financing capital intensive projects as well as an overview of certain financing and derivative instruments currently available in the global financial markets. The first part of the book provides an overview of certain funding and derivative instruments currently used in the international financial markets including a general overview of financial innovations that have occurred in recent decades. Topics covered include an introduction to the syndicated Euro credit market, an overview of various marketable debt securities actively used in the international financial markets, an introduction to depositary receipt as an innovative way of raising cross border equity capital, an elaboration of the derivative instruments most commonly used in the project financing arena including interest rate, currency and commodity swaps, and finally an overview of banks off balance sheet activities as a critical driving force for the participation of banks in the international financial and derivative markets. The second part of the book provides an in depth analysis of project financing that concentrates on the financier's perspective. Topics covered include a general overview of the project financing industry, a step by step description of a typical cross border project finance transaction, a description of the main characteristics and advantages of project financing as opposed to more traditional corporate lending practices, an overview of appraisal techniques for assessing project financing, a comprehensive analysis of the different risk management techniques used in project financing for reducing, distributing and hedging risks, and a brief overview of certain limited resource financing schemes. The book includes a special focus on the various stages of the risk management process for project financing, elaborating on the different stages of risk identification, risk assessment, risk reduction, risk distribution and hedging, and insurance. The authors also provide a comprehensive glossary of terms relating to international finance and project financing. This book will fulfill the need for an essential text on project financing as well as a professional reference guide.

International Business Success in a Strange Cultural Environment Mamarinta P. Mababaya, 2003. The book focuses on the cultural aspect of the author's published PhD thesis entitled *The Role of Multinational Companies in the Middle East: The Case of Saudi Arabia*, which he has carried out at the University of Westminster. It explores the success of multinational enterprises doing business in Saudi Arabia vis-à-vis their cultural awareness and responsiveness. The empirical findings discussed in this book reveal that international business success in a strange cultural environment depends partly on the ability of multinational managers to understand the local culture. The cultural subject in this book pertains to Islam in its entirety. The findings may seem strange to many readers who are not familiar with Islamic culture in its purest form. Many

newcomers to Saudi Arabia especially non Muslim foreign investors businessmen and workers often find many things strange about the Kingdom its people and cultural values Some feel it odd that many Muslims give more importance to prayer than business Some are disappointed when they find commercial establishments like shopping centres closed as Muslim workers go to the mosques to attend to their daily prayers Business visitors find strange the fact that in the midst of their meetings with their Saudi or Muslim counterparts the latter excuse themselves for prayer They have these strange feelings due to their lack of understanding of true Islamic culture The cultural aspect of this book will help businessmen and concerned institutions worldwide gain understanding of Islam and reconcile their cultural differences with the Muslim world Through this book international companies will be able to have a better understanding of authentic Islamic culture which will help them gain greater competitive advantages in the Saudi marketplace
