[The Oxford Handbook of Animal Studies](#) Linda Kalof, 2017-02-01 Intellectual struggles with the animal question how humans can rethink and reconfigure their relationships

with other animals first began to take hold in the 1970s. Over the next forty years, scholars from a wide range of fields would make sweeping reevaluations of the relationship between humans and other animals. The Oxford Handbook of Animal Studies brings these diverse evaluations together for the first time, paying special attention to the commodification of animals, the degradation of the natural world, and a staggering loss of animal habitat and species extinction, and the increasing need for humans to coexist with other animals in urban, rural, and natural contexts. Linda Kalof maps these themes into the five major categories that structure this volume: Animals in the Landscape of Law, Politics, and Public Policy; Animal Intentionality, Agency, and Reflexive Thinking; Animals as Objects in Science, Food, Spectacle, and Sport; Animals in Cultural Representations; and Animals in Ecosystems. Written by international scholars with backgrounds in philosophy, law, history, English, art, sociology, geography, archaeology, environmental studies, cultural studies, and animal advocacy, the thirty chapters in this handbook investigate key issues and concepts central to understanding our current relationship with other animals and the potential for coexistence in an ecological community of living beings.

Animals and Society Margo DeMello, 2021-04-13. Human animal studies is an interdisciplinary field that explores the spaces that animals occupy in human social and cultural worlds. It examines the interactions humans and animals have with each other and the ways animal lives intersect with human societies. Since existing social orders rely on the exploitation of animals to serve human needs, the questions posed by human animal studies touch upon a wide range of fundamental issues. *Animals and Society* provides a broad overview of this rapidly growing field. Margo DeMello offers students and scholars a holistic and comprehensive picture of the state of inquiry into the relationships that exist between humans and other animals. She considers interactions between animals and humans in social organizations such as the family, the legal system, and political and religious institutions. A major focus is the social construction of animals in world cultures and the way in which these social meanings are used to reinforce and perpetuate hierarchical human relationships such as racism, sexism, and class privilege. The book also examines how different human groups construct a range of identities for themselves and for others through animals. This second edition of *Animals and Society* is fully updated and expanded.

throughout enhancing the book's relevance for student and activist readers alike. It includes many new international examples, all new case studies, and updated supplementary readings.
