Return Of The Wild:

Return of the Wild Ted Kerasote, 2001-09 As individuals and as a nation we believe that if we recycle and buy fuel efficient cars we have done our part to protect the environment Yet an important element is missing If we don't conserve the still undeveloped places of the earth human life will be disconnected from its fellow animals and torn from its roots Humans will still exist but as Ted Kerasote explains in his insightful introduction we'll be like potted trees in the foyers of great skyscrapers alone and not part of a wider forest Our efforts to recycle and conserve energy must be augmented with advocacy for the protection of wild spaces and Return of the Wild is an important underpinning for that endeavor a guide through the issues of the day a history a forum for debate a source of information Sponsored by the Pew Wilderness Center the book brings together leading thinkers and writers to examine why nature in its most untrammelled state is vitally important to all of us what currently threatens wild country and what can be done not merely to conserve more of it but also to return it to our lives and consciousness Contributors including Vine Deloria Jr Chris Madson Mike Matz Richard Nelson Thomas M Power Michael Soule Jack Turner and Florence Williams consider a wide range of topics relating to wildlands and explore the varied economic spiritual and ecological justifications for preserving wilderness areas The book also features a completely new four color mapping of the remaining roadless areas on federal lands as well as the National Wilderness Preservation System now measuring 106 million acres in which much of this roadless land could one day be included This first annual edition is both an inspiring and thoughtful introduction to wilderness subjects for the general public and an invaluable reference for legislators the media and conservation organizations It is an essential new contribution to wilderness preservation efforts
