while celebrating New York as both a place and an idea *Theophrastean Studies* William W. Fortenbaugh, 2003

Theophrastus of Eresus was Aristotle's successor as head of the Peripatetic School. He is best known for a humorous collection of character sketches, but his importance in antiquity and for the history of thought in general is much greater. He was the founder of systematic botany, and his work on logic went well beyond that of Aristotle, as did his interest in rhetoric and poetics. He was the first to collect the laws of different city states, and in ethics he emphasized manners as well as moral virtue. In recent years, his importance has been more fully appreciated through the efforts of Professor William Fortenbaugh, who founded Project Theophrastus, an international undertaking whose goal has been to collect, edit, and comment on the fragments of Theophrastus. While leading this project, Professor Fortenbaugh has been writing on Theophrastus, highlighting his achievements and making connections between areas like logic and rhetoric, psychology and religion, ethics and politics. The present volume brings together for the first time twenty-two of his essays. *New York Magazine*, 1990-11-19

New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea. *New York Magazine*, 1990-11-26
