Revival Of Greek Thought 1620 1830:

The Revival of Greek Thought, 1620-1830 George Patrick Henderson, 1971 **The Revival of Greek Thought, 1620-1830**, 1970 **The Making of the Humanities** Rens Bod, Jaap Maat, Thijs Weststeijn, 2010 This first volume in The making of the humanities series focuses on the early modern period Specialists from various disciplines offer their view on the history of linguistics literary studies musicology historiography and philosophy **Russia and the Making of Modern Greek Identity, 1821-1844** Lucien J. Frary, 2015 Explores how Russian politics and religion were instrumental in the shaping of modern Greece providing a broad understanding of nineteenth century Russian foreign policy and religious enterprise and the relationship between religion nationalism and state building **The Emergence of a Greek Identity (1700-1821)** Stratos Myrogiannis, 2012-01-17 This book examines the role of Greek speaking intellectuals in nation formation processes during the Greek Enlightenment The author explores how scholars invoked the concept of the nation and issues closely related to it in order to enforce their demands either for educational reform or for national independence To be more specific he studies the construction of a Modern Greek identity in relation to the Greek and European Enlightenment from 1700 up to the outbreak of the Greek War of Independence in 1821 The theoretical framework the author deploys is twofold On the one hand he exploits the methodological tools provided by the history of concepts as formulated by Koselleck Pocock and Skinner On the other hand he deploys specific concepts from current approaches on nation formation processes in history drawn especially from the works of Anthony Smith Benedict Anderson and Eric Hobsbawm He examines the discursive strategies but also the ideology of relevant works mainly geographies histories and political treatises The corpus of works he studies includes both well known texts e g by Koraes Katartzis and Rigas but also much ignored and so far unexamined works e g by Stanos and Alexandridis Three arguments are intertwined in the present study The first issue that this thesis claims to address is the exploration of the incorporation of Byzantium into a Greek historical schema During the eighteenth century Greek intellectuals attempted to rewrite the history of the Greeks and their main problem was integrating in their narrative the Greek Middle Ages This period was viewed by them as a historical gap In their attempt to bridge this gap the answer they gradually came up with was the invention of what Koraes first named earlier than is previously thought Byzantine history Secondly the present study clarifies the particularities of a transformation process regarding the self image of the Greeks as a political community This process is evident in the writings of Greek speaking intellectuals Influenced by modernity and the emergence of the new political paradigm of the nation these scholars imagined Greek speaking people in terms of a national community The third argument this book aims to develop is the historical link between the Enlightenment as a philosophical movement and nationalism as an ideology The author suggests a reinterpretation of the last stage of the Greek Enlightenment He argues that Greek speaking scholars transmuted enlightening doctrines into a nationalist ideology in order to satisfy the new political needs of the Greek nation for the

creation of an independent state This enlightened nationalism however was not related to the subsequent Romantic ideology but it was based on the liberal ideas of the Enlightenment All in all this book aims to contribute to the study of the Greek Enlightenment by throwing further light on the complex issues of self image and identity *The Greek Struggle for Independence 1821-1833* Douglas Dakin,2023-11-10 The Greek Struggle for Independence 1821 1833 is an illuminating exploration of Greece s historic fight for sovereignty and the birth of the modern Greek state Chronicling the revolution s early achievements and its far reaching implications the book details the nation s transformation from a fragmented uprising to the establishment of a fledgling state whose boundaries initially encompassed only a fraction of the Greek speaking world Through vivid accounts it brings to life the strategic considerations of European powers the persistence of Greek resistance and the interplay of regional and global politics that shaped Greece s borders This comprehensive study captures the incremental expansion of Greece s territory from the Ionian Islands union in 1864 to the incorporation of Thessaly Crete and Macedonia through wars and diplomacy culminating in the Dodecanese s annexation in 1947 The book offers a richly detailed narrative of the political cultural and military forces at play painting a vivid portrait of a nation striving to unify its people and reclaim its heritage Ideal for readers intrigued by Greece s tumultuous history this work provides a compelling look at how independence and national identity were hard won through decades of struggle This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1973

Christianity and Revolutionary Europe, 1750-1830 Nigel Aston,2002 Sample Text **The Enlightenment as Social Criticism** Paschalis M. Kitromilides,2014-07-14 In eighteenth century Greek culture Iosipos Moisiodax c 1725 1800 was a controversial figure whose daring pronouncements in favor of cultural change embroiled him in ideological conflicts and made him a target of persecution The first intellectual in Southeastern Europe to voice the ideas of the Enlightenment in public and without qualification he advocated the use of vernacular Greek in education and aspired to see the backward and intellectually conservative Balkan societies remodeled along European lines In the first modern book length treatment of this passionate reformer Paschalis Kitromilides skillfully retraces Moisiodax s career and contrasts the Greek Enlightenment with the Western Enlightenment as a whole enriching our understanding of each tradition in the process Moisiodax s efforts failed tragically in his own lifetime but his vision of the Enlightenment was an impressive project of intellectual reconstruction that had a considerable effect after his death both in the promotion of modern scientific ideas and in the enunciation of republican politics in Southeastern Europe The methodology of literary history has traditionally dominated inquiries about his life and about the Greek Enlightenment in general but here both man and movement are examined from an interdisciplinary perspective Drawing on a broad range of sources and combining insights from the social sciences cultural history and

political theory this work reveals Moisiodax as a figure of major significance in the ideological tradition of Southeastern Europe Originally published in 1992 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **Enlightenment, Nationalism, Orthodoxy** Paschalis M. Kitromilides, 2024-10-28 The first section of this volume aims to examine various aspects of the impact of Enlightenment thought in the Balkans in the 18th and 19th centuries Particular topics include the idea of modernization with respect to the role of science or the position of women and the growth of new forms of political consciousness but Professor Kitromilides is throughout concerned with the conflict between these incoming political cultural and religious ideas and the traditions of Orthodoxy which had dominated the region under the Ottomans Of the articles a number focus specifically on the Greek world both before and after the creation of an independent Greek world and extend the coverage to include Greek communities beyond Europe Similarly the second part of the volume on dilemmas of nationalism looks also at Greek irredentism in Asia Minor and Cyprus The final item combines bibliographical additions with the author's further reflections on the subjects covered here and their historiography The Culture of the Publisher's Series, Volume 2 John Spiers, 2011-02-18 This volume explores problems concerning the series national development and the national canon in a range of countries and their international book trade relationships Studies focus on issues such as the fabrication of a national canon and on the book in war time the evolution of Catholic literature imperial traditions and colonial libraries
