Reviving Regulatory Reform:

Reviving Regulatory Reform Robert William Hahn, 2000 This study into regulatory reform shows that technological impacts on the economic benefits and costs of regulation and a deeper understanding of the social effects of the regulatory institution are driving policymakers to question the familiar and to propose daring changes *S. 981, the Regulatory Improvement Act of 1998* United States. Congress. Senate. Committee on Governmental Affairs, 1998 *S. 59, Regulatory Right-to-Know Act of 1999, and Congressional Office of Regulatory Analysis Legislation* United States. Congress. Senate. Committee on Governmental Affairs, 1999 *The Legacy of Regulatory Reform*, 1992 **Japan's Economic Revival** D. Citrin, A. Zanello, 2008-10-09 This book focuses on Japan's recent recovery from a decade long stagnation with particular attention to the unfinished policy agenda and the international spillovers of Japan's policies through background studies both analytical and descriptive by IMF economists **Reviving Regulatory Reform** Marlo Lewis, Competitive Enterprise Institute, 2005 This report has a twofold purpose reinvigorate public debate on regulatory reform and help policymakers fashion a more affordable effective and accountable regulatory system The report is organized as follows Section II examines the role of regulatory policy in sabotaging the 1990s economic boom It finds that Federal Communications Commission FCC regulations which subjected the telecommunications industry to a what's yours is mine regime of infrastructure socialism and price control inflicted trillion dollar losses on an industry that was a key driver of the nation's economic growth Regulatory excess contributed to and prolonged the recession The section concludes that Congress and the president who are entrusted with stewardship of the U S economy cannot afford to leave major regulatory decisions in the hands of unaccountable bureaucrats Section III tackles head on the opinion that regulatory reform is a pipedream a thankless quest fraught with political peril and little chance of success The chapter argues that although reformers in the 104th 105th and 106th Congresses failed to establish cost benefit analysis and risk assessment as touchstones of regulatory decision making they also achieved some notable successes The Unfunded Mandates Relief Act UMRA has discouraged Congress from imposing new regulatory burdens on state and local governments The Regulatory Flexibility Act as amended by Small Business Regulatory Enforcement Fairness Act SBREFA and buttressed by President Bush's Executive Order 13272 has in some measure reined in regulatory costs and agency discretion The section recommends that future reform efforts be clearly based on three recognized principles of good government cost disclosure political accountability and competition Section IV examines the basic flaws of the current process Regulatory costs are large growing and what is more disturbing uncontrolled Federal fiscal discipline is indeed weak but federal regulatory discipline is practically non-existent Many regulations function as implicit taxes with far reaching effects on consumer prices employment and innovation Yet nothing in the current process requires or even allows policymakers to make explicit choices about how much of the public's resources regulatory agencies should control or how regulatory authority should be allocated among alternate uses of the same resources Moreover most

regulatory decisions are made by bureaucrats officials over whom We the people have little if any control Americans live under a constitutionally dubious regime of regulation without representation Section V surveys initiatives reformers have proposed adopted or enacted during the past three decades and identifies two main types policing reforms and checks and balances reforms Policing reforms aim via rules of rulemaking and centralized review to regulate the regulators Checks and balances reforms seek to increase Congress's responsibility for regulatory decisions create inter agency competition or foster competition between agency experts and outside experts Both types will be needed to make the regulatory system more affordable effective and accountable Section VI outlines steps to liberate the telecom industry from infrastructure socialism Congress should amend the Telecommunications Act to phase out forced access regulation and price controls as quickly as possible Section VII discusses several near term mid term and long term options for improving the regulatory process Because of its complexity and controversial character the most ambitious long term reform regulatory budgeting is discussed separately in section VIII The most important recommendations for policymakers presented in sections VII and VIII may be summarized as follows 1 Make agencies compete for the right to score the costs and benefits of their regulatory proposals 2 Require congressional approval before rules are effective 3 Undertake pilot projects to explore the feasibility of regulatory budgets Competitive Enterprise Institute web site
