The Russian Empire 1450-1801 Nancy Shields Kollmann, 2017-02-09 Modern Russian identity and historical experience has been largely shaped by Russia's imperial past an empire that was founded in the early modern era and endures in large part today The Russian Empire 1450 1801 surveys how the areas that made up the empire were conquered and how they were governed It considers the Russian empire a Eurasian empire characterized by a politics of difference the rulers and their elites at the center defined the state's needs minimally with control over defense criminal law taxation and mobilization of resources and otherwise tolerated local religions languages cultures elites and institutions The center related to communities and religions vertically according each a modicum of rights and autonomies but didn't allow horizontal connections across nobilities townsmen or other groups potentially with common interests to coalesce Thus the Russian empire was multi ethnic and multi religious Nancy Kollmann gives detailed attention to the major ethnic and religious groups and surveys the government's strategies of governance centralized bureaucracy military reform and a changed judicial system The volume pays particular attention to the dissemination of a supranational ideology of political legitimacy in a variety of media written sources and primarily public ritual painting and particularly architecture Beginning with foundational features such as geography climate demography and geopolitical situation The Russian Empire 1450 1801 explores the empire's primarily agrarian economy serfdom towns and trade as well as the many religious groups primarily Orthodoxy Islam and Buddhism It tracks the emergence of an Imperial nobility and a national self consciousness that was by the end of the eighteenth century distinctly imperial embracing the diversity of the empire's many peoples and cultures

Quest for Status Deborah Welch Larson, Alexei Shevchenko, 2019-01-01 A look at how the desire to improve international status affects Russia's and China's foreign policies Deborah Welch Larson and Alexei Shevchenko argue that the desire for world status plays a key role in shaping the foreign policies of China and Russia Applying social identity theory

the idea that individuals derive part of their identity from larger communities to nations they contend that China and Russia have used various modes of emulation competition and creativity to gain recognition from other countries and thus validate their respective identities To make this argument they analyze numerous cases including Catherine the Great s attempts to westernize Russia China s identity crises in the nineteenth century and both countries responses to the end of the Cold War The authors employ a multifaceted method of measuring status factoring in influence and inclusion in multinational organizations military clout and cultural sway among other considerations Combined with historical precedent this socio psychological approach helps explain current trends in Russian and Chinese foreign policy **Reforming the Tsar's Army**

David Schimmelpenninck van der Oye, Bruce W. Menning, 2004-03-18 This volume examines how Imperial Russia s armed forces sought to adapt to the challenges of modern warfare From Peter the Great to Nicholas II rulers always understood the need to maintain an army and navy capable of preserving the empire s great power status Yet they inevitably faced the dilemma of importing European military and technological innovations while keeping out political ideas that could challenge the autocracy s monopoly on power Within the context of a constant race to avoid oblivion the impulse for military renewal emerges as a fundamental and recurring theme in modern Russian history *Personality and Place in Russian Culture*
Simon Dixon, 2010 Lindsey Hughes 1949-2007 made her reputation as one of the foremost historians of the age of Peter the Great by revealing the more freakish aspects of the tsar s complex mind and reconstructing the various physical environments in which he lived Contributors to *Personality and Place in Russian Culture* were encouraged to develop any of the approaches featured in Hughes s work pointillist and panoramic playful and morbid quotidian and bizarre The result is a rich and original collection ranging from the sixteenth century to the present day in which a group of leading international scholars explore the role of the individual in Russian culture the myriad variety of individual lives and the changing meanings invested in particular places The editor Simon Dixon is Sir Bernard Pares Professor of Russian History at UCL School of Slavonic and East European Studies
