Sargonic Texts in the Ashmolean Museum, Oxford I. J. Gelb, 200? This volume presents transliterations of texts in the Ashmolean Museum most of which are from Kish and Umm el Jir near Kish A few texts of unknown origin have also been included The majority of these tablets are standard administrative texts such as are found in other great collections of Sargonic texts from Gasur the Diyala region Lagash and Susa A small but important group of texts consists of contracts or memos concerning contractual agreements Other types of texts are also represented including letters orders school exercises and one incantation This is the first collection of Sargonic texts from northern Babylonia One of the most important contributions of the Kish and Umm el Jir texts is the light they shed on the geography and ethno linguistic background of Babylonia forty geographic names are mentioned the most common being Mugdan which may represent the ancient name of Umm el Jir Indices of proper names and a catalogue of texts are included One hundred and thirteen tablets are presented in photographic reproduction **Sargonic Texts in the Ashmolean Museum, Oxford** Ignace Jay Gelb, Ashmolean Museum, 1970 This volume presents Sargonic texts in the Ashmolean Museum Oxford Almost all of these texts come from Kish and Umm el Jir near Kish A few Sargonic texts of unknown provenience acquired by the Ashmolean Museum have been added at the end of the volume **Sargonic Texts in the Ashmolean Museum, Oxford** Ignace Jay Gelb, 1957 **Babylonian Epics, Hymns, Omens, and Other Texts** Albert T. Clay, 2005-09-14 The intention of Ancient Texts and Translations ATT is to make available a variety of ancient documents and document collections to a broad range of readers The series will include reprints of long out of print volumes revisions of earlier editions and completely new volumes The understanding of ancient societies depends upon our close reading of the documents however fragmentary that have survived K C Hanson Series Editor **Scribal Education in the Sargonic Period** Nicholas L. Kraus, 2020-10-12 Scribal Education in the Sargonic Period is an in depth analysis of the process of education for scribes during the period of Sargonic hegemony in ancient Mesopotamia c 2335 2150 BCE The book provides a holistic study of the topic addressing the technology of writing the school texts used in education the languages of instruction and the social and historical context of scribal life and an education in cuneiform writing The topic of scribal education at such an early period of Mesopotamian history has never been addressed at length before Nicholas Kraus convincingly argues that scribal education during the Sargonic period was closely tied to the administrative institutions of the Sargonic Empire and prepared a scribe to become an effective administrator The Harvard Semitic Studies series publishes volumes from the Harvard Museum of the Ancient Near East Other series offered by Brill that publish volumes from the Museum include Studies in the Archaeology and History of the Levant and Harvard Semitic Monographs <https://hmane.harvard.edu/publications> **Sargonic Akkadian** Rebecca Hasselbach, 2005 Since the second edition of I J Gelb s Old Akkadian Writing and Grammar in 1961 which is still the standard grammar of Old Akkadian to this day a significant number of new texts from the Old Akkadian period has been discovered and important improvements have

been made regarding the analysis of Old Akkadian and Early Semitic grammar particularly phonology and writing The present volume seeks to update our understanding of the syllabically written textual material from the Sargonic period 2350-2100 BCE which contains most of our evidence for the Akkadian used at this period It consists of a detailed investigation of the Sargonic Akkadian syllabary phonology and morphology with specific focus on geographical and dialectal variations that are noticeable in this text corpus but which have not yet been examined thoroughly The grammatical investigation further compares specific linguistic features of this period with the two later Akkadian dialects Babylonian and Assyrian in order to establish the position of the individual sub groups of Sargonic Akkadian within the dialect geography of Akkadian

A Remarkable Collection of Babylonian Mathematical Texts Jöran Friberg, 2007-07-31 The book analyzes the mathematical tablets from the private collection of Martin Schoyen It includes analyses of tablets which have never been studied before This provides new insight into Babylonian understanding of sophisticated mathematical objects The book is carefully written and organized The tablets are classified according to mathematical content and purpose while drawings and pictures are provided for the most interesting tablets

Cuneiform Parallels to the Old Testament, Second Edition Robert W. Rogers, 2005-07-19 The first major collection of cuneiform texts in English Despite its age this volume still has a major contribution to make Unlike other collections Rogers's volume includes the transliterated Akkadian for each text This provides an invaluable access to the original texts without having a library that includes every volume of the original publications A further asset is the collection of forty-eight excellent photographs and line drawings Included here are tablets, prisms, cylinders, seals, boundary stones, and bas-reliefs The bibliography is composed of two parts The first includes the entries from Rogers's List of Books Quoted or Mentioned but with numerous corrections and supplying much missing data The second part is an updated list organized by major cuneiform languages Diverse Collections Sumerian Akkadian Hittite Hurrian Eblaite and Ugaritic This will direct the reader to the wealth of primary documents that is now our privilege to read

Ancient Near Eastern Art in Context Jack Cheng, Marian H. Feldman, 2007 Through her published works and in the classroom Irene J Winter has served as a mentor for the latest generation of scholars of Mesopotamian visual culture The various contributions to this volume in her honor represent a cross section of the state of scholarship today Topics by the twenty authors include palatial and temple architecture, royal sculpture, gender in the ancient Near East, and interdisciplinary studies that range from the fourth millennium BCE to modern ethnography and cover Sumer, Assyria, Babylonia, Iran, Syria, Urartu, and the Levant Reflections on Winter's scholarship and teaching accompany her bibliography The volume will be useful for scholars who are curious about how visual culture is being used to study the ancient Near East

History of the Akkadian Language (2 vols) Juan-Pablo Vita, 2021-08-09 Akkadian is after Sumerian the second oldest language attested in the Ancient Near East as well as the oldest known Semitic language It is also a language with one of history's longest written records And yet unlike other relevant languages written over a long period of time there has been no volume dedicated to its

own history The aim of the present work is to fill that void The outcome is presented in 26 chapters written by 25 leading authors and divided into two volumes the first covering the linguistic background and early periods and the second covering the second and first millennia BCE as well as its afterlife
