Bentley,Edward S. Ebert,Christine Ebert,2007 Invite young minds to engage in meaningful standards based science Good teachers know that science is more

than just a collection of facts in a textbook and that teaching science goes beyond the mere transmission of information. Actively engaging students in the learning process is critical to building their knowledge base, assessing progress, and meeting science standards. Teaching Constructivist Science K-8 shows teachers how to transform students' natural curiosity into dynamic learning opportunities. By helping students construct new knowledge using the understandings they bring to the classroom, teachers can make the most of instruction and new learning experiences. With practical applications, teaching strategies, activities, and assessment tools, this reader-friendly book demonstrates how to teach student-ready standards-based science. Teachers will be able to use classic and new activities to teach big ideas with basic materials. An interview approach for uncovering student misunderstandings that block new learning. A rich resource list for finding materials and organizations. Guidelines for building a science-friendly environment. Sample lessons and learning experiences aligned to national science standards. Discussion questions for teacher study groups in each chapter. For both experienced and novice teachers, this accessible resource provides the perfect method to teach science in sound ways that make sense to students.

Our Space Environment, Opportunities, Stakes and Dangers Claude Nicollier, Roger-Maurice Bonnet, 2016-02-03. This book explores the opportunities, the potential, and the hazards of Earth's immediate space environment. It covers the physical characteristics of this portion of space, the influence of deeper space, observing and forecasting tools, the problem of space debris, the evolution of satellites, the different orbits and their uses, Earth's place in the solar system and its influence on climate and weather, the sun and its action on our planet, asteroids and comets, and the means to detect them, laws and regulations, the political actors, and the role of nations.
