Srivastava, 2023-01-13. Midlife crisis starts in the life of the person when he crosses the age of 42 in his life. Uranus is the seventh planet from the Sun and completes one revolution every 84 years and stays in a zodiac for 7 years. The transit of Uranus affects the life of every person and it happens only once when Uranus makes an opposite aspect from its natal position at the age of 42 years. After crossing such age, Uranus makes an angle of 180 degrees from its birth position. Therefore, after 42 years, many important changes start in the life of a person. Human life is such a long journey with various twists and turns. Midlife is a junction from where the track of life starts changing. The pace in life does not remain the same and disharmony starts appearing in different aspects of life. This is a phase but this phase comes only to those people who have some specific combination in their birth chart. The stage of midlife crisis begins when the slow moving planets begin to change their positions and form hard aspects with their natal positions. This situation becomes easier when they slowly move out of the respective sign. This book explains when and how the midlife crisis begins. What are those aspects and conjunctions of the planets that affect the person during such a phase? This book further explains the planetary combination for depression and how to overcome such a situation in life. How the transit of slow moving planets affects the life of the native and what is their duration? Midlife crisis is a transition phase. When the journey is long, more preparation has to be done. Midlife crisis offers an opportunity to see another side of the coin that you were completely unaware of until now. Learn to turn a crisis into an opportunity when it knocks on your door. The midlife crisis is just the beginning of the second part of the journey in life.
