*The Saving Remnant* Cedric B. Cowing, 1995 The great flight that brought colonists in the 1600s to what would become New England was a resettlement that had not only a geographical and spiritual impact but an important historical impact as well The influences of the settlers English origins and the fact that various religious groups inhabited specific areas of New England strongly shaped American history through the 1800s and beyond Cedric Cowing demonstrates that there were two Englands one evangelistic and one rationalistic In the northwest of the British Isles was a society that was pastoral westering otherworldly and revivalist in the southeast was another more established and mercantile These two strains set the stage and powered the action for the biggest religious event of the eighteenth century the Great Awakening The leaders of the New Light in the Great Awakening were the Saving Remnant mostly ministers with liberal education who retained their evangelical and seeker religiosity The clearly identifiable regional religious parallels between old England and New are still discernable today and give a new slant to heretofore unresolved historiographical issues Cowing shows how regionalism influenced the nature of New England Puritanism and how the presence of a strong and persistent link between regional origins and religious behavior led to the inevitability of the Salem witch trials *America's Religions* Peter W. Williams, 2008 A panoramic introduction to religion in America newly revised and updated *Religion, Family, and Community in Victorian Canada* Marguerite Van Die, 2006-01-19 Van Die a sympathetic and perceptive observer and a gifted and deft interpreter describes the lives of the Colbys of Carrollcroft members of Canada's emerging economic elite who were active in the local community public life and politics drawing attention to the links connecting domestic religion and private life business concerns and social change in one family's life over three generations **Rally the Scattered Believers** Shelby M. Balik, 2014-05-30 An important new interpretation of how religious change shaped American cultural identity in the early republic *Journal of American History* Northern New England a rugged landscape dotted with transient settlements posed challenges to the traditional town church in the wake of the American Revolution Using the methods of spatial geography Shelby M. Balik examines how migrants adapted their understanding of religious community and spiritual space to survive in the harsh physical surroundings of the region The notions of boundaries place and identity they developed became the basis for spreading New England's deeply rooted spiritual culture even as it opened the way to a new evangelical age I strongly recommend Balik's book for those studying colonial religious landscapes and heritages not only in New England but in the nineteenth century religious diasporas that swept the continent with varying mixes of European colonials and also African and Asian heritages Stanley D. Brunn University of Kentucky In this beautifully written and richly researched work Shelby Balik shows how the travels of early nineteenth century Methodists Universalists and freewill Baptist itinerant missionaries and congregations recreated the geography of New England Protestantism setting in motion literally a tension between religious rootedness and religious uprootedness center and periphery that endures to today Early American religious history

in Balik's retelling of it is one of bodies in constant movement in and out and around the city on the hill. The delight Balik takes in maps and journeys is infectious. This is a wonderful addition to American religious historiography. Robert Orsi, Northwestern University. The Evangelical Counter-Enlightenment William R. Everdell, 2021-05-21. This contribution to the global history of ideas uses biographical profiles of 18th century contemporaries to find what Salafist and Sufi Islam, Evangelical Protestant and Jansenist Catholic Christianity and Hasidic Judaism have in common. Such figures include Muhammad Ibn Abd al Wahab, Count Nikolaus Zinzendorf, Jonathan Edwards, John Wesley, Jean Jacques Rousseau and Israel Ba'al Shem Tov. The book is a unique and comprehensive study of the conflicted relationship between the evangelical movements in all three Abrahamic religions and the ideas of the Enlightenment and Counter Enlightenment. Centered on the 18th century, the book reaches back to the third century for precedents and context and forward to the 21st for the legacy of these movements. This text appeals to students and researchers in many fields including Philosophy and Religion, their histories and World History, while also appealing to the interested lay reader. History and the Christian Historian Ronald Wells, 1998-09-17. This volume arises out of special concerns of historians who are also Christians. What case can be made for connecting historical work and religious convictions? What is the relation of faith to history? What difference could Christian perspectives make in historical study? Thirteen respected scholars, including some who have changed the face of history writing in the twentieth century, here take up a diversity of subjects in giving a provisional answer to these important questions. In exploring foundational issues of perspective and theory, engaging discrete themes such as feminism, puritanism and missiology, and discussing the application of religious insights in teaching history, this excellent collection of essays forthrightly addresses the epistemological crisis brought on by the postmodern critique of truth and demonstrates the positive implications of a Christian perspective for the study of history and historiography.
