accounts of the most important international developments in an area that now occupies a critical place in many fields of academic endeavors. It covers a long history and a dynamic and ever changing present while opening up the academic profession to new scholarship and new ways of thinking. A groundbreaking new approach. While gays and lesbians have shared many aspects of life their histories and cultures developed in profoundly different ways. To reflect this crucial fact the encyclopedia has been prepared in two separate volumes assuring that both histories receive full unbiased attention and that a broad range of human experience is covered. Written for and by a wide range of people. Intended as a reference for students and scholars in all fields as well as for the general public the encyclopedia is written in user friendly language. At the same time it maintains a high level of scholarship that incorporates both passion and objectivity. It is written by some of the most famous names in the field as well as new scholars whose research continues to advance gender studies into the future.

Transnational Interconnections of Nature Studies and the Environmental Humanities Sophia Emmanouilidou, Sezgin Toska, 2020-02-24 How is ecotinking articulated in varied research fields? What are the conjunctions and concurrences of academic endeavors in the attempt to curb environmental destruction? This collection of essays offers a multifaceted exploration of the basic tenets of environmentalism proposed by academic curricula across the world. Ecodestruction, the wilderness, rampant pollution, tourism, developments, sustainability, educational interventions, and the plurivocal turn to ecotheoretical textual analysis are some of the critical perspectives and scientific findings investigated here. The book introduces a multilateral understanding of environmental consciousness and suggests that the study of nature should not be compartmentalized into separate fields of analyses but aim for the interconnections between disciplines given that the physical cosmos is an unambiguous and finite host of humanity's endeavours. The volume appeals to academics, researchers, and professionals with a particular interest in the current environmental crisis. Offers solid insights into the ways human societies construe nature and hopefully will embark on the protection of the ecosphere.
