Scarcity, Conflicts, and Cooperation Pranab Bardhan, 2004-11-05 This wide ranging review of some of the major issues in development economics focuses on the role of economic and political institutions Drawing on the latest findings in institutional economics and political economy Pranab Bardhan a leader in the field of development economics offers a relatively nontechnical discussion of current thinking on these issues from the viewpoint of poor countries synthesizing recent research and reflecting on where we stand today The institutional framework of an economy defines and constrains the opportunities of individuals determines the business climate and shapes the incentives and organizations for collective action on the part of communities Pranab Bardhan finds the institutional framework to be relatively weak in many poor countries Institutional failures weak accountability mechanisms and missed opportunities for cooperative problem solving become the themes of the book with the role of distributive conflicts in the persistence of dysfunctional institutions as a common thread Special issues taken up include the institutions for securing property rights and resolving coordination failures the structural basis of power commitment devices and political accountability the complex relationship between democracy and poverty with examples from India where both have been durable decentralization and devolution of power persistence of corruption ethnic conflicts and impediments to collective action Formal models are largely avoided except in two chapters where Bardhan briefly introduces new models to elucidate currently under researched areas Other chapters review existing models emphasizing the essential ideas rather than the formal details Thus the book will be valuable not only for economists but also for social scientists and policymakers

Although it is often simplified as an ethnic conflict in popular media the current crisis in Darfur can only be superficially defined across ethnic lines Any long term solution to the conflict must also address the underlying social and environmental influences such as changing resource dynamics expanding poverty lack of infrastructure and political corruption which have brought the crisis to a head This project diverges from previous studies by examining how the dynamic interaction between the environment local governance and national policy in Sudan has resulted in the Darfur crisis It demonstrates how ecological degradation and the breakdown of community governance have destabilized the region and how corruption and incompetence at the national level have culminated in the current crisis Analyzing the interplay of these factors will yield valuable insights as to how a concerned international community can both end the tragic genocide and address the underlying injustices that engendered it The analysis presented will be informative and accessible to a wide readership of students academics and concerned citizens Business Regulation and Public Policy André Nijssen,John Hudson,Christoph Müller,Kees van Paridon,R. A Contemporary Comprehensive Economic Science Stefano Spalletti, Francesca

Spigarelli, 2025-11-18 Covering Maffeo Pantaleoni's key areas of contribution to economics this book provides a comprehensive study of one of the foremost economic thinkers of the late 19th and early 20th centuries. Called the prince of Italian economists by Piero Sraffa among others, Maffeo Pantaleoni (1857-1924) was an original and innovative thinker but also bizarre and extravagant. As a result, he did not produce an inherently continuous and systematic work but his contributions oscillate between a shifting idealism and heterogeneous operational criteria. Contrasting with the specialisation which pervades the economic sciences today, rereading Pantaleoni one hundred years after his death it is clear that he excelled in pure as much as in applied economics, in public economics as in statistical or historical economic studies. Overall, his expertise spanned fields of economics that are now considered disaggregated and distant from each other. Thus, the Pantaleonian spirit, which was innovative and completist and could not be confined within any enclosure, was lost a century ago. This volume brings together a group of specialists capable of identifying the many points of contact between Pantaleoni's multiform thought and the disciplinary plurality of his economics, thus providing a Complete Economic Science of which Pantaleoni would be proud. The book will be of interest to economists, readers in history of economic thought, intellectual history, Italian history more broadly, and scholars with diverse profiles of interest.

Addressing Inequality in South Asia The World Bank, 2014-10-08 Inequality in South Asia appears to be moderate when looking at standard indicators such as the Gini index which are based on consumption expenditures per capita. But other pieces of evidence reveal enormous gaps from extravagant wealth at one end to lack of access to the most basic services at the other. Which prompts the question: How bad is inequality in South Asia? And why would that matter? This book takes a comprehensive look at the extent, nature, and drivers of inequality in this very dynamic region of the world. It discusses how some dimensions of inequality, such as high returns to investments in human capital, contribute to economic growth, while others, such as high payoffs to rent seeking or broken aspirations, undermine it. Drawing upon a variety of data sources, it disentangles the contribution that opportunity in young age, mobility in adult years, and support throughout life make to inequality at any point in time. Equally important, the book sheds light on the prospects of escaping disadvantage over time. The analysis shows that South Asia performs poorly in terms of opportunity. Access to basic services is partial at best and can be traced to characteristics at birth, including gender, location, and caste. Conversely, the region has had a robust performance in terms of geographical and occupational mobility despite its cluttered urbanization and widespread informality. Migration and jobs have served disadvantaged groups better than the rest, highlighting the importance of the urbanization and private sector development agendas. Support falls somewhere in between. Poverty alleviation programs are pervasive, but the mobilization of public resources is limited, and much of it is wasted in regressive subsidies while inter-government transfers do not do enough to mitigate spatial inequalities.

Development and Economic Growth in India Biswa Swarup Misra, 2022-12-30 Notwithstanding the improved growth performance of India, development disparity across its states has widened in the first two decades of the
