Memory, Brain, and Belief Daniel L. Schacter, Elaine Scarry, 2001 This text will be stimulating to scholars in several academic fields It ranges from cognitive neurological and pathological perspectives on memory and belief to memory and belief in autobiographical narratives **Road Scars** Robert Matej Bednar, 2020-07-21 Despite the ubiquity of automobility the reality of automotive death is hidden from everyday view There are accident blackspots all over the roads that we use and go past every day but the people that have died there or been injured are not marked unless by homemade shrines and personal memorialization Nowhere on the planet is this practice as densely actioned as in the United States Road Scars is a highly visual scholarly monograph about how roadside car crash shrines place the collective trauma of living in a car culture

in the everyday landscapes of automobility Roadside shrines or road trauma shrines are vernacular memorial assemblages built by private individuals at sites where family and friends have died in automobile accidents either while driving cars or motorcycles or being hit by cars as pedestrians bicyclists or motorcyclists Prevalent for decades in Latin America and in the American Southwest roadside car crash shrines are now present throughout the U S and around the world Some are simply small white crosses almost silent markers of places of traumatic death Others are elaborate collections of objects texts and materials from all over the map culturally and physically all significantly brought together not in the home or in a cemetery but on the roadside in drivable public space a space where private individuals perform private identities alongside each other in public and where these private mobilities sometimes collide with one another in traumatic ways that are negotiated in roadside shrines This book touches on something many of us have seen but few have explored intellectually **Show'em Your Scars** Robert Mattingly,2005-09 **Cartographer of scars** Madina Fedosova,2025-09-24 Sarajevo is bleeding The war has cost Doctor Milos everything But from the ruins of his personal tragedy his mission is born to become a cartographer of scars He maps not the borders of nations but a geography of human suffering Each line is a story of survival a testament to broken lives and unbreakable will **Uncovering Memory** Tanja Sakota,2023-03-01 My interest in site specific research is not random My mother escaped through the sewers of Breslau Germany in 1945 today known as Wroclaw Poland My father was born in a country that no longer exists Their final destination was Johannesburg South Africa This is where I enter the narrative I was born during apartheid and my interest in memory and identity is a result of my historical and political context Each one of us comes with a history a complex web of DNA and a library of information that shapes who we are and how we view the world How can we use our own complexities not only to engage with one another but to build it for story content As an artistic researcher filmmaker and educator Tanja Sakota has often thought how to bring this subjective experience into pedagogical practice Using paired themes of memory and forgetting segregation and migration perpetrators and victims Sakota travels along a timeline of memory as she takes us on a journey through South Africa Germany Poland and Bosnia Herzegovina Using a camera and short film techniques she hosts several workshops focused on interacting and engaging with remembering through different memory sites The author sits at the core but the book is an interdisciplinary work shaped around films made by different participants using the camera to access and unveil personal interpretations of space and place Questions that underpin the uncovering of memories are How does one use a camera to unmask invisible memories hidden within sites How does one remember events that one hasn't necessarily experienced How does one use film to interrogate the past from the future present As the journey evolves workshop participants and readers alike enter into a conversation around practice based research autoethnography and film Uncovering Memory is not a handbook offering a prescriptive method Instead it is a pedagogical text that offers an interactive approach for students and peers to consider adapt or react to in their own teaching and learning practices The narrative encourages readers to self reflect as they explore

their own memory using the camera and short film format as an engaging tool for research and knowledge production

Violence, Torture and Memory in Sri Lanka Dhana Hughes, 2013-07-31 Drawing on original ethnographic field research conducted primarily with former guerrilla insurgents in southern and central Sri Lanka this book analyses the memories and narratives of people who have perpetrated political violence It explores how violence is negotiated and lived with in the aftermath and its implications for the self and social relationships from the perspectives of those who have inflicted it The book sheds ethnographic light on a largely overlooked and little understood conflict that took place within the majority Sinhala community in the late 1980s known locally as the Terror Bheeshanaya It illuminates the ways in which the ethical charge carried by violence seeps into the fabric of life in the aftermath and discusses that for those who have perpetrated violence the mediation of its memory is ethically tendentious and steeped in the moral carrying important implications for notions of the self and for the negotiation of sociality in the present Providing an important understanding of the motivations meanings and consequences of violence the book is of interest to students and scholars of South Asia Political Science Trauma Studies and War Studies

[The Pleasures of Memory in Shakespeare's Sonnets](#) John S. Garrison, 2023-09-19 *The Pleasures of Memory in Shakespeare's Sonnets* uses Shakespeare's poetry as a case study for the mutually formative relationship between desire and recollection Through a series of close readings that are both historically situated and informed by recent theory it traces how the speaker of the poems strives for a more agential relationship to his own memory by treating recollection as a form of narrative Drawing together insights from cognitive science the early modern memory arts and psychoanalysis John S. Garrison connects the *Sonnets* to the larger Renaissance project of conceiving memory as a faculty to be developed and managed through self discipline and rhetoric In doing so he reveals how early modern thought presaged many theories that have emerged in contemporary neuroscientific and psychoanalytic understandings of the self and its longing for pleasure The *Sonnets* emerge as a collection that contemplates the affective dimensions and conceptual overlaps that bind anticipation to retrospection in the fraught pursuit of erotic pleasure Indispensable for students and scholars working on Shakespeare's poetry this study appeals also to a broader audience of readers interested in affect memory and sexuality studies Shakespeare's most beloved sonnets are discussed as well as less familiar ones alongside contemporary adaptations of the poems Garrison brings the *Sonnets* further into the present by comparing them with treatments of pleasure and memory by modern authors such as C. P. Cavafy Toni Morrison William Faulkner and Michael Ondaatje
