Warner, 2000-05-31 Changing Workplace Relations in the Chinese Economy attempts to deal with how China's economic reforms have undermined the iron rice bowl system which since the 1950s has provided both lifetime employment and cradle to the grave welfare for many workers particularly those in state owned enterprises It starts by examining the background of these reforms and how they have changed workplace relations in the Chinese economy it will also look at key themes relating to the role of trade unions and the management of human resources in both state owned and joint venture firms finally a number of illustrative case studies involving industrial relations and human resource management are set out A set of contributors drawn from a wide range of disciplines and nationalities who are expert in these fields have contributed chapters to the volume **Danwei** Xiaobo Lü, Elizabeth J. Perry, 1997 Originating from a Chinese studies symposium U of California Berkeley 1994 13 contributors lead by Lu Columbia U and Perry Harvard U explore the danwei hierarchy of state owned workplace units in Chinese cities The system confers such economic political and social perks that a 3:1 urban to rural ratio prevailed by Mao's demise Until recently one could not freely transfer to another unit or travel without the approval of one's work unit Although sociologists e.g Whyte and Parish have studied this system so central to Chinese workers lives questions remain that are addressed here on the origins of danwei its unique functions and how the institution is faring under contemporary reforms Paper edition unseen 34/95 Annotation copyrighted by Book News Inc Portland OR
