Analytical Psychology and German Classical Aesthetics: Goethe, Schiller, and Jung, Volume 1 Paul Bishop, 2007-08-07 In this volume Paul Bishop investigates the extent to which analytical psychology draws on concepts found in German classical aesthetics. It aims to place analytical psychology in the German speaking tradition of Goethe and Schiller with which Jung was well acquainted. Analytical Psychology and German Classical Aesthetics argues that analytical psychology appropriates many of its central notions from German classical aesthetics and that when seen in its intellectual historical context the true originality of analytical psychology lies in its reformulation of key tenets of German classicism. Although the importance for Jung of German thought in general and of Goethe and Schiller in particular has frequently been acknowledged until now it has never been examined in any detailed or systematic way. Through an analysis of Jung's reception of Goethe and Schiller, Analytical Psychology and German Classical Aesthetics demonstrates the intellectual continuity within analytical psychology and the filiation of ideas from German classical aesthetics to Jungian thought. In this way it suggests that a rereading of analytical psychology in the light of German classical aesthetics offers an intellectually coherent understanding of analytical psychology. By uncovering the philosophical sources of analytical psychology this first volume returns Jung's thought to its core intellectual tradition in the light of which analytical psychology gains new critical impact and fresh relevance for modern thought. Written in a scholarly yet accessible style this book will interest students and scholars alike in the areas of analytical psychology, comparative literature and the history of ideas.

Analytical Psychology and German Classical Aesthetics: Goethe, Schiller, and Jung Volume 2 Paul Bishop, 2008-07-16 The second volume of Analytical Psychology and German Classical Aesthetics builds on the previous volume to show how German classicism, specifically the classical aesthetics associated with Goethe and Schiller, known as Weimar classicism, was a major influence on psychoanalysis and analytical psychology alike. This volume examines such significant parallels between analytical psychology and Weimar classicism as the methodological similarities between Goethe's morphological and Jung's archetypal approaches, which both seek to use synthesis as well as analysis in their attempt to understand the world. It also focuses on the project of the construction of the self, which it is argued is not only a personal but also a cultural activity. This book, like its previous volume, aims to clarify the intellectual continuity between Weimar classicism and analytical psychology. It will be of interest to both students and scholars in the fields of analytical psychology, comparative literature and the history of ideas.

Schiller's Aesthetic Essays Lesley Sharpe, 1995 Friedrich Schiller, the dramatist and poet, greatly influenced the development of aesthetics through his essays. He sums up the eighteenth century while anticipating modern ideas; his notions of the naive and the sentimental, of art as play and of beauty as semblance, have had a lasting impact on aesthetic speculation. Dr Sharpe's book is the first study devoted to tracing the attempts of successive generations of philosophers and literary critics to expound the works and deal with the problems they present.
