

Children and adolescents patient with psychotic features

- Consider differential diagnoses such as
 - Organic mental Conditions
 - Substance induced disorders
 - Drug induced psychosis
 - Acute and transient psychotic disorder
 - Persistent delusional disorder
 - Schizoaffective disorder
 - Severe depression with psychotic symptoms
 - Mania with psychotic symptoms

Establish the diagnosis of schizophrenia as per the prevailing nosological system

Assessment

- Severity of illness
- Risk of harm to self and others
- Comorbid substance use/dependence
- Education history and Level of functioning: educational decline, educational difficulties
- Evaluate for possible psychiatric comorbidities: attention deficit hyperkinetic disorder, oppositional defiant disorder, affective disorders (depression/mania), separation anxiety disorders, other anxiety disorders, obsessive compulsive disorder, tics
- Detailed Physical examination to rule out possible medical causes
- Record: blood pressure, weight and wherever indicated body mass index and waist circumference
- Mental Status Examination
- Investigations - hemogram, blood glucose and lipid levels, liver function test, renal function test, serum calcium, electrocardiogram (focus on QTc), thyroid function test, Neuroimaging (Magnetic Resonance Imaging), Electroencephalogram, metabolic profile
- Optional Investigations: Vitamin D levels, Vitamin B 12 levels, urinary porphobilinogen, serum ceruloplasmin levels, serum prolactin levels
- Treatment history: response to previous medication trials, compliance, side effects, etc.
- Psychosocial assessment: social support, social networks, family environment, coping, stigma, distress
- Patient's and caregivers beliefs about the cause of illness and beliefs about the treatment
- Assessment of caregiver burden, coping, and distress

- Decide about treatment setting: consider inpatient care in case of suicidality, severe agitation and violence, malnutrition, catatonia, patient unable to care for self to the extent that she/he requires constant supervision or support, comorbid general medical conditions making management difficult at the outpatient setting, those who require prolonged observation for clarification of diagnosis. Subjects who have problems with treatment compliance or delivery leading to unduly protracted treatment, those who require ECT, those who require removal from a hostile social environment
- Liaison with other specialists depending on the need of the patient

Pharmacological Management

- Choose an antipsychotic based on side effect profile of the agent, patient and family preference, cost and affordability, clinician's familiarity with the use of a particular antipsychotic medication in children and adolescents, psychiatric comorbidity, medical comorbidity, concomitant medications, past treatment response/non-response, past history of side effects, treatment resistance

Nonpharmacological management

- Psychoeducation
- Psychosocial interventions

Electroconvulsive therapy

- Catatonia, suicidality, past response to ECT, augmentation

Children, Adolescents and Families with Severe Mental Illness: Towards a Comprehensive Early Identification of Risk Andrea Raballo, Frauke Schultze-Lutter, Marco Armando, 2022-01-27

Chronic Mental Illness in Children and Adolescents John G. Looney, 1988 The purpose of this book is to address the problem of children and adolescents who have mental disorders that are chronic While some emotional disorders in youngsters are reactive disorders which with professional help will be corrected by the natural process of psychological growth there are youth who have illnesses that go on interminably For those children the existing mental health system has been ineffective In order to begin to address the needs of such youngsters the first step is to bring together people knowledgeable about the problem This volume integrates material presented at the National Conference on Chronic Mental Illness in Children and Adolescents as well as knowledge that has developed since the time of that conference This reference looks at many of the problems encountered in treating chronically mentally ill youngsters such as determining the population of this group improving the method and quality of care delivery and analysis of epidemiological data and public policy impediments The importance of skillful clinical work with families and

methods of providing family assessment and care are discussed Treatment evaluation to determine which modalities of care are most effective for which types of children is discussed as part of the treatment program Much of this book focuses upon strategy policy and politics *Clinical Topics in Child and Adolescent Psychiatry* Sarah Huline-Dickens, 2014-03-03 However much policy material is produced the real function of most child psychiatrists is to assess and treat mental disorders in childhood and adolescence This is a comprehensive update on the field that will inform the clinical practice of all child and adolescent mental health professionals The authors bring the medical perspective to bear on psychopathology and demonstrate that our understanding of childhood psychiatric disorders their origins and their treatments are improving They write with a particular focus on four contemporary themes continuity into adult life the integration of biological and social aetiology the influence of neuroscience and the increasing use of research and evidence and take into account recent changes in DSM 5 Some chapters have been specially commissioned for this book while previous versions of the others have been published in the journal *Advances in Psychiatric Treatment* and have now been fully revised and updated in line with the four themes The new chapters include disorders in 0 to 4 year olds Tourette syndrome and the clinically significant topic of anxiety Other topics include autism spectrum disorders behavioural and affective disorders pharmacology and psychological therapies fabrication and induction of illness and gender dysphoria All the topics covered are central to the work of practising child and adolescent mental health professionals and many will also be relevant to paediatricians psychologists social workers and trainees in all these fields **Child and Adolescent Behavioral Health** Edilma L. Yearwood, Geraldine S. Pearson, Jamesetta A. Newland, 2012-01-18 As an increasing number of children and adolescents with psychiatric symptoms go unrecognized in our current healthcare system the ability to identify and treat these issues in multiple healthcare settings has become vitally important With access to primary care providers increasing and a shortage of child psychiatric providers collaboration between psychiatric pediatric and family advanced practice nurses is essential to improving care for this vulnerable population *Child and Adolescent Behavioral Health* provides a practical reference to aid in this endeavour Written and reviewed by over 70 nurse experts it is a must have reference for all practitioners caring for children and adolescents

in numerical analysis newton s method also known as the newton raphson method named after isaac newton and joseph raphson is a root finding algorithm which produces successively better approximations to the roots or zeroes of a real valued function the most basic version starts with a single variable function f defined for a real variable x the function s derivative f' and an initial guess x_0 for a root of f if the function satisfies sufficient assumptions and the initial guess is close
