JSTOR Roger C. Schonfeld,2012-02-24 Ten years ago most scholars and students relied on bulky card catalogs printed bibliographic indices and hardcopy books and journals Today much content is available electronically or online This book examines the history of one of the first and most successful digital resources for scholarly communication JSTOR Beginning as a grant funded project of the Andrew W Mellon Foundation at the University of Michigan JSTOR has grown to become a major archive of the backfiles of academic journals and its own nonprofit organization Roger Schonfeld begins this history by looking at JSTOR s original mission of saving storage space and thereby storage costs a mission that expanded immediately to improving access to the literature What role did the University play Could JSTOR have been built without the active involvement of a foundation Why was it seen as necessary to spin off the project This case study proceeds as an

organizational history of the birth and maturation of this nonprofit which had to emerge from the original university partnership to carve its own identity How did the grant project evolve into a successful marketplace enterprise How was JSTOR able to serve its twofold mission of archiving its journals while also providing access to them What has accounted for its growth Finally Schonfeld considers implications of the economic and organizational aspects of archiving as well as the system wide savings that JSTOR ensures by broadly distributing costs Historical Information Science Lawrence J. McCrank,2001 Here is an extensive review and bibliographic essay backed by 5 000 citations about developments in information technology since the advent of personal computing and the convergence of the disciplines Its focus is on the access preservation and analysis of historical information primarily in electronic form and the relationships between new methodology and instructional media technique and research trends in library special collections digital libraries electronic and data archives and museums **Minutes of the Meeting** Association of Research Libraries,1983 V 52 includes the proceedings of the conference on the Farmington Plan 1959 **Stealing Into Print** Marcel C. fabricating *The Future of Resource Sharing* Shirley K. Baker, Mary E. Jackson, 2019-12-06 This book first published in 1995 addresses the key issue facing libraries on how to survive in an age of interdependence. Increasingly individual libraries must act as if each is part of a world library. Instead of being self-sufficient, each library from the small public library to the large research library must find ways to put materials from this world library into the hands of its patrons and must stand ready to supply materials from its own collection to others both quickly and cost-effectively through interlibrary loan. It explores the critical questions for making resource sharing work with particular emphasis on interlibrary loan, cooperative collection development, economic decision models, consortial arrangements, copyright dilemmas, and the possibilities of technology. A national project to revamp interlibrary loan and document delivery is described, and future directions are posited. Authors present historical perspective, explore the future, and report from multiple perspectives. *Books in the Digital Age* John B. Thompson, 2013-10-21 The book publishing industry is going through a period of profound and turbulent change brought about in part by the digital revolution. What is the role of the book in an age preoccupied with computers and the internet? How has the book publishing industry been transformed by the economic and technological upheavals of recent years, and how is it likely to change in the future? This is the first major study of the book publishing industry in Britain and the United States for more than two decades. Thompson focuses on academic and higher education publishing and analyses the evolution of these sectors from 1980 to the present. He shows that each sector is characterized by its own distinctive logic or dynamic of change, and that by reconstructing this logic we can understand the problems, challenges, and opportunities faced by publishing firms today. He also shows that the digital revolution has had and continues to have a profound impact on the book publishing business, although the real impact of this revolution has little to do with the ebook scenarios imagined by many commentators. *Books in the Digital Age* will become a standard work on the publishing industry at the beginning of the 21st century. It will be of great interest to students taking courses in the sociology of culture, media, and cultural studies, and publishing. It will also be of great value to professionals in the publishing industry, educators, and policy makers, and to anyone interested in books and their future. **The Research Universities and Their Patrons** Robert M. Rosenzweig, Barbara Turlington, 1982-01-01 *Bridging the Gap* Sul H. Lee, 2013-09-13 The amount of digital information that libraries need to manage effectively for the benefit of users is constantly increasing. Respected leaders in the field of librarianship explore various aspects of how librarians are meeting the challenges of delivering more digital information to a changing user base, including preservation, demands, licensing agreements, digitizing, and making available collections unique to specific libraries, and providing more personalized digital services to library users. This book focuses on timely issues that impact how libraries are administered and viewed by both librarians and by users.
