School Administration As A Craft Foundations Of Practice

Arthur Blumberg

School Administration As A Craft Foundations Of Practice:

School Administration as a Craft Arthur Blumberg, 1989 The Knowledge Base in Educational Administration Robert Donmoyer, Michael Imber, James Joseph Scheurich, 1995-01-01 This anthology summarizes and critiques the current knowledge base in the field of educational administration Working (With/out) the System Denise E. Armstrong, James Ryan, 2016-01-01 This edited collection of chapters from invited scholars explores issues of social justice and micropolitics in educational institutions More specifically it examines the ways in which social justice workers navigate or can navigate micropolitical systems in their quest to promote social justice Issues of social justice and micropolitics are particularly important in this day and age as standardizing regimes and polarizing forces continue to erode the already perilous condition of the traditionally disadvantaged While social justice workers make it a point to acknowledge the plight of the less fortunate their well meaning attempts to take action are not always successful This requires that they acknowledge the realities of the micropolitical environments in which they work and to take action in these arenas if they are to achieve their social justice goals The title of the book Working With out the System draws attention to the ways in which social justice workers leaders teachers administrators students community members navigate educational institutions and the wider social systems that are not always hospitable to changes that promote social justice This volume describes the prospects possibilities and actual practice of working with working without and working outside of educational organizations to promote social justice Among other topics the chapters probe the manner in which social justice minded leaders navigate micropolitical environments the ways in which social justice minded leaders promote and sustain social justice action within systemic contexts the difficulties and successes that they experience **The Art of Educational Leadership** Fenwick W. English, 2007-08-14 English successfully challenges the established educational community to rethink the current state of research on school leadership in the social sciences The inclusion of theory discourse and stories of recognized leaders followed by chapter learning extensions that include key concepts movie recommendations and prompted reflective journaling makes this book a most valuable resource for the educational leadership community H J Bultinck CHOICE The Art of Educational Leadership provides one of the most complete examinations of leadership that I have encountered I admire the way it urges students to think and reflect The format allows individual learners to focus on those materials that best fit their learning style while the numerous presentations of a single topic through the different modalities strengthens the learning This text is a fresh new look at leadership Louise L MacKay East Tennessee State University Fenwick W English returns to themes of leadership he explored in more than 20 earlier books and dozens of presentation to educator audiences He favors re centering educational leadership in the humanities rather than acting on the recommendation of the business literature and he emphasizes the use of films as a way to humanize leadership concepts THE SCHOOL ADMINISTRATOR Excellent cogent analysis of key concepts of leadership are presented in a reader friendly style Saul B Grossman Temple University Moves beyond established notions

of leadership to recognize that effective leading is about drama and performance artistry *The Art of Educational Leadership: Balancing Performance and Accountability* stresses the human side of leadership. No other text on this topic demonstrates so ably the importance of artistry in leadership in a field that has been lopsidedly dominated by concepts informed by science. Presenting the idea that leadership is an art, this book exemplifies a balance between the science and the art of educational leadership. The real improvement of practice is rooted in the art of application which is about context and represents the key to leadership practice. Connects content material to self discovery. Exercises at the end of each chapter include creating a personal reflective journal to engage the reader in and reflect upon theories and practices presented in the book. Films are suggested for viewing to illustrate the interaction between context, culture, decisions and outcomes. Portrays multicultural leadership in action. Biography boxes throughout the book share how multicultural educational and political leaders who have been recognized as expert practitioners learned the art of leadership in the public arena. This is the first book in educational leadership to sketch out a balance between the science and the art of the field. The text illustrates how performance and practice represent the art while the delineation of the skills and conceptual models represent the science. Resources in Education, 1998. *The Aesthetic Dimensions of Educational Administration & Leadership* Eugenie A. Samier, Richard Bates, 2006-11-22. The question of aesthetics as a theoretical framework for thinking about modern leadership issues in educational settings is an emergent area of inquiry that is receiving considerable attention. There is a growing sense that the mechanistic approach to leadership which has been widely encouraged over the last ten years is sterile and that a more philosophical approach is now required. This approach is covered here taking into account the importance of aesthetics on all aspects of the administrative and leadership world: the ways ideas and ideals are created; how their expression is conveyed; the impact they have on interpersonal relationships and the organisational environment that carries and reinforces them; and the moral boundaries or limits that can be established or exceeded. While presenting a significant departure from conventional studies in the field, the international contributors reflect a continuity of thought on administrative and leadership authority from the writings of Plato through to current theory. The Handbook of Educational Theories Beverly Irby, Genevieve H. Brown, Rafael Lara-Alecio, Dr. Shirley A. Jackson, 2013-03-01. Although educational theories are presented in a variety of textbooks and in some discipline specific handbooks and encyclopedias, no publication exists which serves as a comprehensive consolidated collection of the most influential and most frequently quoted and consulted theories. There is a need to put such theories into a single easily accessible volume. A unique feature of the Handbook is the way in which it conveys the theories. The organization of the chapters within each section makes the volume an easy to use and understandable reference tool as researchers and practitioners seek theories to guide their research and practice and as they develop theoretical frameworks. In addition to the traditional theories presented, the Handbook includes emerging theories for the 21st Century as well as presenting practical examples of the use of these theories in research from

dissertations and published articles An appendix which indicates which theories have instruments associated with them and where those instruments can be found is also included The Handbook consists of 12 sections Section I provides the introduction with a focus on what constitutes good theory as well as how theory guides research and practice The remaining sections address Philosophical Educational Constructs Learning Theory Instructional Theory Curriculum theory Literacy and Language Acquisition Theory Counseling Theory Moral Development Theory Classroom Management Theory Assessment Theory Organizational Theory and Leadership Management Theory Each section consists of an overview written by the section editor of the general theoretical concepts to be addressed by the chapter authors Each chapter within the section will include a a description of the theory with goals assumptions and aspects particular to the theory b the original development of and interactions of the theory c validation of the theory d generalizability of the theory across cultures ethnicities and genders e the use and application of the theory f critiques of the theory g any instruments associated with the theory and h two to five particular studies exemplifying particular theories as individuals have used them in theoretical framework of dissertations or published articles and be written by the original theorist or prominent contributors to the theory The Handbook is intended for graduate students enrolled in research courses or completing theses and dissertations Additionally professors of all educational disciplines in the social sciences would be an interested audience There is also potential use of the text as administrators counselors and teachers in schools use theory to guide practice As more inquiry is being promoted among school leaders this book has more meaning for practitioners
