The Creator of the Universe Corrado Ghinamo, 2015-05-11 Are science and faith antithetic Are the new discoveries in science making faith in God totter Or can science be the basis for strong faith and the belief in a Creator Discover how The Creator of the Universe is the author's original manuscript that gave birth to the book The Beautiful Scientist This amazing book takes an interesting look at science and faith and how the two can work together to prove there is a Creator Corrado Ghinamo believes it is the very existence of the universe that allows people to see there is a super entity there is a God He uses scientific evidence like the Big Bang Theory the smallest particles of the universe the galaxies and what he calls the Super Force to prove just that God does exist Creation and evolution are not two separate ideals rather evolution is one of the means that God used and still uses in creating and governing the universe Ghinamo shows that God is a logical necessity to complete the vision of scientist's universe The same goes for people of faith there is scientific evidence that can further the existence of a Creator The Creator

of the Universe A Scientific Approach to Christian Faith uses easy to understand language examples from everyday life and an easy to follow structure to prove that the universe far more beautiful and complex than people can imagine was in fact created by God and that evidence and rationality in science can lead to the belief in God
