**Analogies and Models in Science and Theology** Humphrey Uchechukwu Ude, 2024-07-17 This book uses the tenets of Hesse's Network Model of theory NMT to debunk scientism and argue for the indispensability of socio cultural matrices including theological values in the search for objective knowledge It is unique in many respects First it uses the notion of analogies and models to evaluate the structure of scientific knowledge and extrapolates its findings in Christian theological discussions Second there is no known scholarly work to the best of my knowledge which does an in depth and extensive study of Mary Hesse from the point of view of her NMT It uses the notion of

entrenchment not only to distinguish itself from other related concepts such as holism but also to support the argument on invariance theory observation statements Third it underscores the indispensability of socio cultural matrices in the search for knowledge by identifying a link between Hesse and Habermas in what I call Hesse Habermas Sociology of Knowledge Finally it employs the notion of metaphoric redescription to argue that both science and theology deal with interpretation of observed phenomena It is a reliable source to all interested in epistemological debates philosophically minded students of science and scientifically minded philosophers theologians metaphysicians students of religion and sociology especially students of Habermas
