Scientific Methods in Medieval Archaeology Rainer Berfer, 1979

**Handbook of Medieval Studies** Albrecht

Classen, 2010-11-29 This interdisciplinary handbook provides extensive information about research in medieval studies and its most important results over the last decades. The handbook is a reference work which enables the readers to quickly and purposely gain insight into the important research discussions and to inform themselves about the current status of research in the field. The handbook consists of four parts. The first large section offers articles on all of the main disciplines and discussions of the field. The second section presents articles on the key concepts of modern medieval studies and the debates therein. The third section is a lexicon of the most important text genres of the Middle Ages. The fourth section provides an international bio-bibliographical lexicon of the most prominent medievalists in all disciplines. A comprehensive bibliography rounds off the compendium. The result is a reference work which exhaustively documents the current status of research in medieval studies and brings the disciplines and experts of the field together.

**Advances in Archaeological Method and Theory** Michael B. Schiffer, 2014-06-30. *Advances in Archaeological Method and Theory* Volume 4 presents the progressive explorations in methods and theory in archaeology. This book discusses the increasing application of surface collection in cultural resource management. Organized into eight chapters, this volume begins with an overview of the fundamental aspects of archaeoastronomy and explains what kinds of testable hypotheses that archaeoastronomy generates. This text then examines the general implications for the study of cultural complexity. Other chapters consider the use of surface artifacts by archaeologists to locate sites, establish regional culture histories, and to know where to excavate within sites. This book discusses as well the interpretative interfaces between archaeology on the one hand and ethnohistory and ethnology on the other that is based on a theoretical stance advocating a fundamental holistic approach to anthropology. The final chapter deals with understanding the ecology of ancient organisms. This book is a valuable resource for archaeologists and anthropologists.

**Viator, Medieval and Renaissance Studies, Volume 7 (1976)** The Center for Medieval and Renaissance Studies, 2023-11-15. This title is part of UC Press's Voices Revived program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, *Voices Revived* makes high-quality peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1976.

*Basic Methods of Conserving Underwater Archaeological Material Culture* Donny Leon Hamilton, 1996. **Tree Rings and Climate** H. Fritts, 2012-12-02. *Tree Rings and Climate* deals with the principles of dendrochronology with emphasis on tree ring studies involving climate-related problems. This book looks at the spatial and temporal variations in tree ring growth and how they can be used to reconstruct past climate. Factors and conditions that appear most relevant to tree ring research are highlighted. Comprised of nine chapters, this book opens with an overview of the basic biological facts and principles of tree growth as well as the most important terms, principles, and

concepts of dendrochronology The discussion then shifts to the basic biology governing the response of ring width to variation in climate systematic variations in the width and cell structure of annual tree rings and the significance of tree growth and structure to dendroclimatology The movement of materials and internal water relations of trees are also considered along with photosynthesis respiration and the climatic and environmental system Models of the growth climate relationships as well as the basic statistics and methods of analysis of these relationships are described The final chapter includes a general discussion of dendroclimatographic data and presents examples of statistical models that are useful for reconstructing spatial variations in climate This monograph will be of interest to climatologists college students and practitioners in fields such as botany archaeology hydrology oceanography biology physiology forestry and geophysics **An**
