the Impact and Influence of the Work of Ivor Goodson offers a critical commentary on Goodson's work that avoids hagiography whilst recognising the global reach of his scholarship. With contributors from around the world, those who have collaborated with him or those who have taken up his work, the book provides the sort of social and historical contextualising that Goodson has always advocated. The accounts in this collection highlight how Goodson's integration of moral imperatives into strategically responsive scholarship can provide a useful roadmap when negotiating a path through the contemporary academic research landscape. By using his historian's orientation and sensibilities, he is able to get to the heart of the logics of schooling. By connecting with other scholars and researchers around the world, he exposes how the global neo-liberal project plays out in particular settings and so challenges pervasive understandings about the meaning of global and the power of the neo-liberal project itself. This book is ideal reading for academics, scholars and researchers in the field of education, including those involved in initial and in-service teacher education.

**A Science Career Against all Odds** Bernhard

Wunderlich, 2010-03-01 Today is Sunday June 17, 2007. Father's Day. Naturally, the obligatory carefully selected cards, phone calls and small gifts arrived from the children and grandchildren. Best wishes for Father's Day were also the first words in the morning from Heidi, my wife of 54 years. Although for many years I had made the comment "I am not your father," but in the frame of my life's experiences, this in the 20th century as I intend to summarize them over the next few years, the 17th of June has much deeper significance. This was the day in 1953 when we finally fled from our life of oppression which had lasted 20 years. Two successive dictatorships, one of Hitler and the other of Stalin, caused the most horrific slaughter of civilians and soldiers eclipsing all prior history. During these first years of my life, I was plainly lucky to survive. After this day, I had a much better chance to experience the freedom needed to lead a life of creativity, satisfaction and ultimately prosperity, all directed largely by our own decisions. The 17th of June, 1953, was a Wednesday. I stayed in the apartment of my parents in my hometown of Brandenburg in the German Democratic Republic (GDR), the former Russian-occupied zone of Germany. The summer vacation of the Humboldt University in East Berlin, some 40 miles further east, had just started. But I was alone with my father. Vati.
