Nations at War Daniel S. Geller, J. David Singer, 1998-02-13 *Nations at War* provides an explanation of war in international politics grounded on data based empirical research The book classifies and synthesizes the research findings of over 500 quantitative analyses of war at the analytic level of the state dyad region and international system Because wars follow from political decisions two basic decision making models the rational and the non rational are examined in relation to the explanatory framework of the volume In addition case analyses of two wars the Iran Iraq War 1980 and World War I 1914 are provided as demonstrations of scientifically based explanations of

historical events The primary structural factors responsible for the onset and seriousness of war are identified and the explanations are developed according to the scientific model of covering laws The conclusion presents a discussion of the potential for probabilistic conditional predictions of conflict within the context of war and peace studies **Territory, War, and Peace** John A. Vasquez, Marie T. Henahan, 2023-04-14 This book presents a collection of new and updated essays on what has come to be known as the territorial explanation of war The book argues that a key both to peace and to war lies in understanding the role territory plays as a source of conflict and inter group violence Of all the issues that spark conflict territorial disputes have the highest probability of escalating to war War however is hardly inevitable much depends on how territorial issues are handled More importantly settling territorial disputes and establishing mutually recognized boundaries can produce long periods of peace between neighbors even if other salient issues arise While territory is not the only cause of war and wars arise from other issues territory is one of the main causes of war and learning how to manage it can in principle eliminate an entire class of wars This book will be of great interest to all students of war and conflict studies causes of war and peace international security and strategic studies John A Vasquez is Thomas B Mackie Scholar in International Relations at the University of Illinois Urbana Champaign He is author of *The Steps to War* 2008 with Paul Senese and *The War Puzzle Revisited* 2009 He has been president of the Peace Science Society International and the International Studies Association Marie T Henahan is Director of Internships and Lecturer Department of Political Science at the University of Illinois Urbana Champaign She is author of *Foreign Policy and Congress An International Relations Perspective* and co editor of *The Scientific Study of Peace and War* *What Do We Know about War?* Sara McLaughlin Mitchell, John A. Vasquez, 2021-04 This invaluable text in an all new set of chapters brings together leading international relations scholars to assess the current theory and research on the causes of war and what promotes peace Considering fifty years of research the contributors provide a student friendly overview of current knowledge and an agenda for future questions **Guide to the Scientific Study of International Processes** Sara McLaughlin Mitchell, Paul F. Diehl, James D. Morrow, 2012-07-17 Dedicated to the empirical analysis of data from the world of international relations SSIP scholars tend to focus on interstate conflicts civil wars and conflict management The range of perspectives in this edited volume provide a comprehensive introduction to SSIP theory and methodology Fresh approach traces intellectual development of research approaches rather than merely summarizing results Features original SSIP material not found in other books Includes a number of essays with a broader assessment of SSIP methods ideal for younger scholars interested in the approach Includes recent SSIP analyses exploring issues such as civil wars **Advancing Peace Research** J. David Singer, 2012-04-27 Professor J David Singer has been arguably the most important influence on quantitative research into the causes and attributes of war His pioneering work on the Correlates of War project at the University of Michigan and his numerous books and articles have inspired generations of researchers in the fields of international relations conflict analysis security studies and peace science This
