Criminal Trial Oriola Sallavaci, 2014-02-05 This book explores challenges posed by the use of DNA evidence to the traditional features procedures and principles of the criminal trial It examines the limitations of existing theories of criminal trial processes in the face of increasing use of scientific evidence in the court room The research elucidates the interconnections at trial of three epistemologies namely legal reasoning as represented by counsel and trial judge common

sense manifested by the jury and scientific reasoning expounded by the expert witness Sallavaci argues that while scientific reasoning is part of this hybrid of trial languages and practices its extended use is producing specifically novel tensions which impact on the traditional criminal trial landscape Through the lens of DNA evidence the book investigates how far the use of scientific evidence in the fact finding process poses challenges for the adversarial character of the proceedings and rules of evidence how it affects the role of the judge jury and expert witness as well as the principle of orality and continuity of the trial In comparing the challenges faced in English common law trials to those of the USA this book has international scope and will be of great use and interest to students and researchers of Criminal Law and Practice Policing and the role of Forensics in Law *The Jury as Fact Finder and Community Presence in Civil Justice* ,2005 Expert Evidence and Scientific Proof in Criminal Trials Paul Roberts,2017-07-05 Forensic science evidence and expert witness testimony play an increasingly prominent role in modern criminal proceedings Science produces powerful evidence of criminal offending but has also courted controversy and sometimes contributed towards miscarriages of justice The twenty six articles and essays reproduced in this volume explore the theoretical foundations of modern scientific proof and critically consider the practical issues to which expert evidence gives rise in contemporary criminal trials The essays are prefaced by a substantial new introduction which provides an overview and incisive commentary contextualising the key debates The volume begins by placing forensic science in interdisciplinary focus with contributions from historical sociological Science and Technology Studies STS philosophical and jurisprudential perspectives This is followed by closer examination of the role of forensic science and other expert evidence in criminal proceedings exposing enduring tensions and addressing recent controversies in the relationship between science and criminal law A third set of contributions considers the practical challenges of interpreting and communicating forensic science evidence This perennial battle continues to be fought at the intersection between the logic of scientific inference and the psychology of the fact finder s common sense reasoning Finally the volume s fourth group of essays evaluates the limited success of existing procedural reforms aimed at improving the reception of expert testimony in criminal adjudication and considers future prospects for institutional renewal with a keen eye to comparative law models and experiences success stories and cautionary tales *Open Courts with Sealed Files* ,2004

The Privatization of Justice? ,2006 *The American Bench* Mary Reincke, Jeanene C. Wilhelmi,2009 Critical Perspectives on Nonacademic Science and Engineering Paul T. Durbin,1991 This volume is an attempt to get philosophers to concentrate on what scientists and engineers actually do Current Problems in the Protection of Human Rights Katja S Ziegler, Peter M Huber,2013-03-01 While the legal systems of the United Kingdom and Germany differ in essential respects the current process of constitutionalisation is well recognised on both sides of the Channel Constitutionalisation manifests itself in the evolution of a constitution and the influence of existing constitutional principles on the ordinary law Human rights law provides one of the best examples of this process and the aim of this book is to provide a comparative UK German

perspective on recent developments First it addresses human rights questions which arise in both jurisdictions in a similar way such as the tension between liberty and security absolute rights such as human dignity and the prohibition of torture and the question how conflicts between human rights are to be resolved and conceptualised A second theme considers the impact of human rights on different areas of law in particular administrative law criminal law labour law and private law generally Finally a third theme focuses on the intersection of national supra and international human rights law in particular after the entry into force of the EU Charter on Fundamental Rights The book thus reveals convergent and divergent answers to similar problems examines differences in the impact of human rights on the legal systems under consideration and traces parallel and distinct debates over and sensitivities about human rights as well as sensitivities that arise in multi layer situations in the UK and Germany
