Abstract: *There are two types of matter in the universe: inanimate and animate. Inanimate matter comprises small objects ranging from atoms and molecules to quarks and quanta, while animate matter refers to the soul with excitement, feelings, mind, and consciousness, as in animals and humans, which forms the basis of life. Science best studies inanimate matter. However, animate matter has not yet been properly studied. In this article, we discuss the causal condition or scientific study of the origin, development, and movement of the soul by studying the scientific evidence of Buddhist views, such as the law of karma and reincarnation or the afterlife.*

Keywords: Buddha, Body, Mind, Soul, Karma, Rebirth, Consciousness, Evolution, Reincarnation

One-Sentence Summary:

“Buddhism is the science of knowing the truth of life” - Albert Einstein

1. Introduction

What is soul? In many religions and philosophical traditions, the soul is the spiritual essence of creators, which includes one's identity, personality, memories, and immaterial aspects, or the essence of a living being that is believed to be able to survive the physical body (1, 2).

Throughout history and across cultures, people have believed in some sort of soul and afterlife.

The current scientific paradigms doesn't recognize this spiritual dimension of life.

Scientists have conducted extensive research on the soul. For instance, Dr. Robert Lanza, a stem cell researcher, has proposed a theory called “biocentrism” that suggests that the soul exists, and that consciousness is fundamental to the universe (3). He said “Biocentrism will shatter the reader's ideas of lifetime and space, and even death. At the same time, it will release us from the dull worldview of life being merely the activity of an admixture of carbon and a few other elements; it suggests the exhilarating possibility that life is fundamentally immortal”.

Robert T. Bigelow, a space entrepreneur from the United States, has conducted sign the soul. To this end, he established the Bigelow Institute for Consciousness Studies (BICS), and in 2020 he organized worldwide an essay contest on the topic “Is there life after death?” to raise awareness and stimulate research on the survival of human consciousness after physical death, with a global prize of \$2 million, and approximately 1000 people participated (4). One of the essay contest winners, parapsychologist, PhD Jeffrey Mishlove, adduced nine factors, such as near-death experiences, after-death communication, reincarnation, and mental and physical medium ship, that show the possibility of life after death, and concluded that there is life after death (5). This essay can be considered practical proof of the existence of life after death.

In this article we aim to prove the existence of the soul.

2. Scientific evidence for the existence of the soul

Here we will argue that from the point of view of reason and logic, it is reasonable to believe that spirit and matter is a bundle of energy, and that the soul is created from energy through animal under the of appropriate causal conditions. And man arose of the evolution of animal. After death the animal and human the soul separated from body and the soul has found its reincarnation in one of the six types of animals, and one after another is reborn cyclically in the form of a wheel in samsara. Samsara is a place where animals and people are reborn after death according to Buddhist concepts.

In (6) we have proved that afterlife exists after death using set theory (7), a branch of mathematics. In other words, it has been theoretically proven that life exists after death.

The following theorem describes the afterlife or reincarnation:

Theorem (Afterlife or reincarnation)

If firstly, the objects and phenomena of the non-eternal universe exist in three forms: matter, spirit, and an imperfect cluster of elements—animals and humans. Secondly, when these animals and humans die, their bodies and minds/souls are separated, then after death the animals and humans their body and mind separated, and their soul/mind is reborn in one of the six animals of samsara depending on their consciousness. If people develop their consciousness, they will be able to improve their next rebirth in the three higher realms of beings, as a human, an animal of Asura Heaven, or an animal of Heaven, and may even become a Buddha. In contrast, if humans do not develop their consciousness, the soul can be reborn as one of the three lower beings, as beasts, ordinary animals, or animal of hell, or even may

Scientific Evidence Of The Existence Of:

Proof of the Existence of God Rev. Stephen Badu-Yeboah, 2013-11-29 This book is a bridge between science and religion For much of the ancient times until the eighteenth century all our human issues and answers were based on religion However from the eighteenth century onward even though it started from the second century and peaked a bit more during the thirteenth century people questioned the authenticity of all the religious responses to all our human quest For this reason many scientists conducted scientific research to find out the evidentiary truth to the religious responses about the universe origin of moral values the existence of God etc This book is about the true origin of moral values and about the true existence of God In this book I seek to give objective scientific philological and religious explanations as to the real existence of God I also seek to explain who is the source of our moral values In the final analysis I do suggest in this book that science and religion are friends who are seeking and seeing the same thing from different perspectives Therefore they proclaim their findings with different names which are generally of similar philological meaning I also suggest that with the present lack of objective evidentiary proof God cannot be said to exist anthropomorphically but truly exists pneumatologically and he is the creator of our existence and the source of our moral values

Lines of Evidence: How Recent Science Infers the Existence of God Rick Jory, 2023-08-18 Secular science demands we accept the philosophical dogma of scientific materialism that only material entities exist Yet recent science has discovered the immaterial Also mandated is the assumption that all things must be explained by natural causes But we now are certain that the universe had a beginning There was a time when nature didn't exist and yet we must attribute the origin of the universe to nature And what about Darwin's theory of evolution taken as fact that every plant and animal owe its origin to a common ancestor and naturalistic causes At the time of Darwin over a century and a half ago no one knew the true complexity of the cell We now know the simplest of living organisms has 159 662 base pairs of DNA and 182 protein coding genes What naturalistic cause put all of this together Could this be assembled by blind purposeless accident What does recent science have to say And what about recent discoveries in origin of life research Do we now know enough to suggest life could not have created itself A lot is happening in today's science that is best explained through the Christian worldview Let's see what some of today's scientists are now saying

Science Confirms the Existence of God Kevin Bradford Ornellas, 2022-05-15 This book demonstrates that God exists and the book does so on the grounds of secular scientific data and mathematics While that might not sound possible this book demonstrates it using insight into a key verse 2Peter 3:8 to help set up a mathematical model of what the Bible is asserting to be true When compared to modern scientific data a direct correlation between what Saint Peter and the Genesis Writer said was true and what occurred according to modern scientific data is presented If you've ever wondered whether God exists or not read this book If you've ever felt discouraged at the idea of not seeing a possible way to reconcile God and Science the way is contained in this book

Seeking God in Science Bradley Monton, 2009-07-20 The doctrine of intelligent design is often the subject of acrimonious debate Seeking God in Science cuts through the rhetoric that distorts the debates between religious and secular camps Bradley Monton a philosopher of science and an atheist carefully considers the arguments for intelligent design and argues that intelligent design deserves serious consideration as a scientific theory Monton also gives a lucid account of the debate surrounding the inclusion of intelligent design in public schools and presents reason why students science education could benefit from a careful consideration of the arguments for and against it

Biosafety Measures, Technology Risks and the World Trade Organization Alessandra Guida, 2022-12-23 This book examines the work of the World Trade Organization WTO with a focus on the capacity of its judiciary to strike a reasoned balance between free trade in biotechnology and biosafety as to promote the 2030 Agenda for Sustainable Development and its Sustainable Development Goals By adopting an innovative interpretation of the precautionary principle and proportionality analysis the work offers normative suggestions to develop what the author terms a constructive bridge of knowledge between decision makers scientists social experts and expert witnesses which can support a judicial balance by design rather than by chance Biotechnology is sometimes regarded as a panacea for modern day challenges such as feeding a growing world population and counteracting climate change problems and a means of offering significant economic opportunities However

biotechnology can present uncertain though serious risks to human health and the environment i.e biosafety Trading biotech products magnifies these risks and benefits globally This book explores the topical though still underexplored question of how to find a point of equilibrium between the revolutionary advancement offered by technology and the need to safeguard biosafety from uncertain though potentially irreversible technology risks It offers a thorough analysis of normative judicial and epistemic issues hindering a reasoned balance between trade and non trade interests under the WTO The work offers practical relevance for the resolution of legal disputes in contexts of uncertainty as well as innovative theoretical contributions It will be a valuable resource for policymakers working on precautionary governance and management scholars in the areas of trade law human rights law and environmental law law students and practitioners as well as NGOs working in the field of new technologies biosafety sustainability and food safety
