

Principles of Science

Scientific Explanations and Interpretations

Facts, Observations, and Opinions

- **Science** is an inherently objective topic, as it requires facts to explain the world.
- **Facts** are information that are true.
- Facts come from data and results collected from observations and experiments.
- **Data** is factual information that isn't affected by opinions or bias.
- When conducting experiments, scientists can use **observations** and **analysis** to collect facts and predict what happens in the world.

Study Tip

Think about something you've read in a magazine, whether it is an article or a horoscope. Can you identify which are facts, and which are not?

Concept Check

- What is the difference between facts and data?
- Keep a lookout for opinions that sound like facts: investigate where the information comes from and whether it is true or not.
