Science, Technology, and Society David D. Kumar, Daryl E. Chubin, 2012-12-06 David D. Kumar and Daryl E. Chubin We live in an information age Technology abounds information technology communication technology learning technology As a once popular song went Something's happening here but it's just not exactly clear The world appears to be a smaller less remote place We live in it but we are not necessarily closely tied to it We lack a satisfactory understanding of it So we are left with a paradox In an information age information alone will neither inform nor improve us as citizens nor our democracy society or institutions No improvement will take some effort It is a heavy burden to be reflective indeed analytical and disciplined but only constructively constrained by different perspectives The science-based technology that makes for the complexity controversy and uncertainty of life sows the seeds of understanding in Science Technology and Society STS as it is known encompasses a hybrid area of scholarship now nearly three decades old As D. R. Sarewitz a former geologist now congressional staffer and an author put it After all the important and often controversial policy dilemmas posed by issues such as nuclear energy toxic waste disposal global climate change or biotechnology cannot be resolved by authoritative scientific knowledge instead they must involve a balancing of technical considerations with other criteria that are explicitly non-scientific ethics aesthetics equity ideology Trade-offs must be made in light of inevitable uncertainties Sarewitz 1996 p. 182

onwards      **Science, Technology and Society** Klaus-Heinrich Standke, M. Anandakrishnan, 2013-10-22 Science Technology and Society Needs Challenges and Limitations focuses on the role of science and technology in promoting development as well as its limitation in shaping the society The text outlines the contributions that this field has provided in health industries agriculture transportation and communication The book puts emphasis on the role of technologists and scientists in promoting development such as in the fields of biology and medicine The text notes the emergence of socio economic problems in the sector of food and agriculture and how these problems can be solved by the application of agricultural technologies Case studies in this regard that is presented in this book include fish handling and distribution improving soil fertility and feed resources for animal feeding The role of science and technology in the management of water resources is noted and the problems associated with the application of science and technology to water resources development are discussed Science and technology has also played an important role in improving the quality of life in human settlements The text is a valuable source of data for scientists and technologists who aim to improve science and technology and serve the interest of mankind      Journal of the Elisha Mitchell Scientific Society Elisha Mitchell Scientific Society (Chapel Hill, N.C.), 1919 Vols 20 include Proceedings of the North Carolina academy of science 1902
