**Culture and the City** Deborah Stevenson, Amie Matthews, 2013-09-13 This edited collection will examine the way in which cities are imagined experienced and shaped by those who reside within them those who manage or govern them and those who as visitor tourist or traveller pass through them Attention will be paid to the influence that these various inhabitants have on city life and living and the dialectic that exists between their sometimes collective and sometimes divergent perceptions and uses of city space In conjunction with this the collection will explore the ways in which local culture and cultural policy are used by public and private interests as the framework for changing the image and amenity of the city in order to raise its profile and attract tourists The book contributes to discussions of the increasingly high profile place that cultural programs have in urban regeneration initiatives and explore the tensions conflicts and negotiations that emerge in urban spaces as a result of policy and culture coming together Papers will be sought from researchers around the world with a view to examining the nexus between tourism leisure and cultural programming from a number of perspectives and with reference to a range of

international case studies This book was published as a special issue of the Journal of Policy Research in Tourism Leisure and Events **Geodesigning Our Future** Shlomit Flint Ashery,2024-05-10 This book examines how map based collaboration software can facilitate negotiations in areas undergoing contentious pressures for significant change Based on case studies from Israel it aims to introduce a useful model of planning implementation as an outcome of complex interaction to reduce the gap between planning and urban reality It puts an analytical realist foundation for a productive discussion of the role of future planning and bares meaningful scientific contributions to the general frame of the negotiating process and implementation which still needs further research and elaboration Geodesign a cutting edge planning approach that is rooted in the history of planning practice has become one of the most popular approaches for sustainable planning and design activities after 2000s Planners tend to think of design at a site scale but geodesign covers a variety of scales bridging the gap between the regional and the local contexts This is important because to be practically effective and politically prudent smart growth plans need to make sense across a spectrum of scales and disciplines This ranges from design urban design community planning town and city planning and regional planning up to planning for mega regions **Advances in Transportation and Health** Mark Nieuwenhuijsen,Haneen Khreis,2020-04-07 Transportation and Health provides state of the art knowledge on the many linkages between transport and health the available tools needed to estimate and evaluate the health impacts of transport future technologies the developments that can change the direction and magnitude of the health impacts and the policy and education issues that can result in better practice and knowledge translation The book provides valuable information on how and why to take health into consideration in transport planning and policy showing how to estimate the impacts of transport on health in planning policymaking education and workforce development **Micromobility** Selim Dünder,2025-01-20 This book provides a comprehensive overview on micromobility which is a mode of transportation that has become particularly popular among young people in recent years due to the impact of the COVID 19 pandemic and supports public transport for short distances It includes contributions by an interdisciplinary pool of authors from civil engineering urban and regional planning law social sciences physiotherapy and rehabilitation It demonstrates that micromobility is a developing mode of transportation and represents a service that needs to be integrated into the transportation system The book addresses micromobility from various perspectives making it a reference tool for researchers transportation planners operators decision makers and policy makers A special focus is put on the effects of micromobility on health the business models and the legal status of micromobility systems reflecting perspectives from both health sciences and social sciences *The Catalog of Catalogs* ,1995 **Promoting walking and cycling** World Health Organization,2025-05-08 This toolkit presents a compendium of policy options for walking and cycling highlighting the multiple benefits that promoting and enabling safe walking and cycling for recreation and transport can bring to individuals communities the environment and the economy It outlines seven strategic policy options for countries to consider

implementing that collectively aim to enable safer walking and cycling for people of all ages and abilities and to support maintaining and or increasing levels of walking and cycling either for transport or active recreation in countries worldwide Case studies are included to showcase real world examples of how these policy options are being successfully put into practice

*Shifting Mobility* Dewan Masud Karim, 2025-03-13 Embark on a journey into the heart of a new industrial revolution one that promises to redefine human mobility for generations to come In this groundbreaking exploration we confront the promises and perils of new mobility navigating the intricate landscape where technology intersects with urban society As cities evolve and technology shapes our daily lives the ethical dimensions of this transformation remain largely uncharted territory Amidst the rapid advancement of new mobility systems this book sheds light on the moral dilemmas and philosophical underpinnings that often go unnoticed From the ethical implications of technology to the systemic flaws in planning and design we delve into the core of this paradigm shift By understanding the foundational principles of mobility and the hidden codes that govern human movement we pave the way for a more equitable and inclusive future At the heart of this transformative vision lies a comprehensive framework for building a new mobility ecosystem one that prioritizes human well being and equity above all else Through innovative planning processes and redesign concepts we aim to bridge the gap between technology and society ensuring that every individual has access to safe efficient and sustainable modes of transportation From low emission vehicles to multimodal transit hubs this book presents a blueprint for reimagining urban spaces and redefining the way we move By embracing shared values and collective responsibility we strive to create a world where mobility is not just a privilege but a fundamental human right As we embark on this journey towards a more sustainable future let us remember that the true measure of progress lies not in technological innovation alone but in our ability to build communities that thrive together Join us in shaping the future of mobility one where humanity and equity reign supreme
