Contributors Lawrence E. Aten, Elin C. Danien, Don D. Fowler, Alice B. Kehoe, Frances Joan Mathien, Jerald T. Milanich, Robert L. Schuyler, Steven Conn, Regna Darnell, Curtis M. Hinsley, Eleanor M. King, David J. Meltzer, Jeremy A. Sabloff, David R. Wilcox **A History of Anthropology as a Holistic Science** Glynn Custred, 2016-04-27 A History of Anthropology as a Holistic Science defends the holistic scientific approach by examining its history which is in part a story of adventure and its sound philosophical foundation. It shows that activism and the holistic scientific approach need not compete with one another. This book discusses how anthropology developed in the nineteenth century during what has been called the Second Scientific Revolution. It emerged in the United States in its holistic four-field form from the confluence of four lines of inquiry: the British, the French, the German, and the American. As the discipline grew and became more specialized, a tendency of divergence set in that weakened its holistic appeal. Beginning in the 1960s, a new movement arose within the discipline which called for abandoning science as anthropology's mission in order to convert it into an instrument of social change, a redefinition which weakens its effectiveness as a way of understanding humankind and which threatens to discredit the discipline.

Forensic Anthropology C. Clifford Boyd, Jr., Donna C. Boyd, 2018-03-19 Provides comprehensive coverage of everything that students and practitioners need to know about working in the field of forensic anthropology. Forensic anthropology has been plagued by questions of scientific validity and rigor despite its acceptance as a section in the American Academy of Forensic Sciences nearly half a century ago. Critics have viewed it as a laboratory-based applied subfield of biological anthropology and characterized it as emphasizing methodology over theory. This book shows that these views are not only antiquated but inadequate and inaccurate. Forensic Anthropology: Theoretical Framework and Scientific Basis introduces readers to all of the theoretical and scientific foundations of forensic anthropology, beginning with how it was influenced by the early theoretical approaches of Tyler Morgan, Spencer, and Darwin. It instructs on how modern forensic science relies on an interdisciplinary approach with research being conducted in the fields of archaeology, physics, geology, and other disciplines. This modern approach to theory in forensic anthropology is presented through the introduction and discussion of Foundational, Interpretive, and Methodological theories. Sections cover Bias and Objectivity in Forensic Anthropology Theory and Practice, The Theory and Science Behind Biological Profile and Personal Identification, Scientific Foundation for Interpretations of Antemortem, Perimortem, and Postmortem Processes, and Interdisciplinary Influences, Legal Ramifications, and Future Directions. Illustrates important aspects of the theory-building process and reflects methods for strengthening the scientific framework of forensic anthropology as a discipline. Inspired by the Application of Theory to Forensic Anthropology symposium presented at the 67th annual meeting of the American Academy of Forensic Sciences. Chapters written by experts in the field who were presenters at the symposium. Forensic Anthropology: Theoretical Framework and Scientific Basis is ideal

Jon McGee, Richard L. Warms, 2013-08-28 Social and cultural anthropology and archaeology are rich subjects with deep connections in the social and physical sciences Over the past 150 years the subject matter and different theoretical perspectives have expanded so greatly that no single individual can command all of it Consequently both advanced students and professionals may be confronted with theoretical positions and names of theorists with whom they are only partially familiar if they have heard of them at all Students in particular are likely to turn to the web to find quick background information on theorists and theories However most web based information is inaccurate and or lacks depth Students and professionals need a source to provide a quick overview of a particular theory and theorist with just the basics the who what where how and why if you will In response SAGE Reference plans to publish the two volume Theory in Social and Cultural Anthropology An Encyclopedia Features Benefits Two volumes containing approximately 335 signed entries provide users with the most authoritative and thorough reference resource available on anthropology theory both in terms of breadth and depth of coverage To ease navigation between and among related entries a Reader's Guide groups entries

Theorizing the Anthropology of Belief Luke J. Matthews, Paul Robertson, 2024-02-01 This book explores both scientific and humanistic theoretical traditions in anthropology through the lens of ontology The first part of the book examines different methods for generating valid anthropological knowledge and proposes a shift in current consensus Drawing on Western scholars of antiquity and the medieval period and moving away from 20th century theorists it argues that we must first make ontological assumptions about the kinds of things that can exist or not before we can then develop epistemologies that study those kinds of things The book goes on to apply the ontology first theory to a set of case studies in modern day conspiracy theories misinformation and magical thinking It asserts that we need to move away from unneeded metaphysical assumptions of conspiracy theories being misinformation and argues that reconstructing particular historical events can be a fruitful zone for application of quantitative methods to humanistic questions *Theorizing the Anthropology of Belief* is an excellent supplementary suitable for upper level undergraduate and graduate courses in anthropological theory
