Governing International Watercourses Susanne Schmeier, 2013 In this contribution to the academic and policy debates surrounding the management and governance of shared natural resources the focus is placed on River Basin Organizations as the key institutions for managing internationally shared water resources The book includes advice to policy makers based on worldwide analysis and three detailed case studies from three continents the Senegal West Africa Mekong South east Asia and Danube Europe rivers English Mechanic and Mirror of Science and Art, 1892 Universal Jurisdiction: The Sierra Leone Profile

Justice Bankole Thompson, 2015-03-12 The doctrine of universal jurisdiction has evolved throughout modern times in the context of global criminal justice as a paramount agent of combating impunity emanating from international criminality Sierra Leone as a member of the international community and the United Nations has in recent times been a pioneer in the progressive application and development of international criminal law in the African region Despite this role the country's profile both in terms of the incorporation and application of the doctrine of universal jurisdiction is deficient in several major respects falling far short of its dual international obligation not to provide safe havens from justice for perpetrators of international crimes and to combat impunity from such criminogenic acts Hence a compelling reason for the author to write this book was to provide a seminal scholarly work on the subject articulating the existing state of the law in Sierra Leone and highlighting the deficiencies in the law and factors inhibiting the exercise of universal jurisdiction in this UN member state It was also to propose necessary substantive and procedural law reforms in the state's jurisprudence on the subject The book is recommended reading for practitioners and scholars in international criminal law and related disciplines Its accessibility is highly enhanced by relevant tables and summaries of each chapter Justice Rosolu J B Thompson is Professor Emeritus of Criminal Justice Studies Eastern Kentucky University USA He was a member of and Presiding Judge in Trial Chamber I of the Special Court for Sierra Leone **Sustainable Development** Rumen Gechev, 2005 The criteria for

sustainable development have become a decisive factor in the formulation and assessment of economic policy models. By its nature, sustainable development is a multidimensional category; therefore, it requires an interdisciplinary approach. This study is focused on the economic aspects of sustainable development. However, the analysis includes the interdependences of the noneconomic dimensions. The author proposes a new definition for sustainable development that incorporates those dimensions and suggests a new GDP matrix that better integrates the quantitative and the qualitative parameters of the economic output, including its effect on the environmental equilibrium.

Advances in Visual Information Systems Robert Laurini, 2000-10-18. Presently in our world, visual information dominates. The turn of the millenium marks the age of visual information systems. Enabled by picture sensors of all kinds, turning digital visual information will not only enhance the value of existing information; it will also open up a new horizon of previously untapped information sources. There is a huge demand for visual information access from the consumer. As well, the handling of visual information is boosted by the rapid increase of hardware and Internet capabilities. Advanced technology for visual information systems is more urgently needed than ever before, not only new computational methods to retrieve, index, compress, and uncover pictorial information, but also new metaphors to organize user interfaces. Also, new ideas and algorithms are needed which allow access to very large databases of digital pictures and videos. Finally, we should not forget new systems with visual interfaces integrating the above components into new types of image, video, or multimedia databases and hyperdocuments. All of these technologies will enable the construction of systems that are radically different from conventional information systems. Many novel issues will need to be addressed: query formulation for pictorial information, consistency management thereof, indexing, and assessing the quality of these systems. Historically, the expression Visual Information Systems can be understood either as a system for image information or as a visual system for any kind of information.

maritime sector The private security industry continues to evolve after its renaissance over the past few decades first in Africa and later in Iraq and Afghanistan Despite this little academic work has been done to date on the role of private security in the maritime environment This lacuna has become more pronounced as the threat of piracy terrorism and other acts of maritime political violence have caused littoral states and commercial entities alike to consider the use of private security to mitigate risks Maritime Private Security is an edited volume specifically dedicated to combating the absence of academic research in this area The discussion of this multi faceted subject is organised into four key parts Part I The Historical and Contemporary Market in Maritime Private Security Services Part II The Emergence of Private Anti Piracy Escorts in the Commercial Sector Part III The Privatization of Coast Guard Services Part IV Private Security Responses to Maritime Terrorism This book will be of much interest to students of naval policy and maritime security private security companies piracy and terrorism international law and IR in general
