identities both in the church and wider community What is the process by which specific regional repertoires and styles develop Which organisations and venues have been particularly conducive to the development of sacred singing in the community How does the subject matter of songs relate to the immediate environment of coastal inhabitants How and why has gospel singing in coastal communities changed These questions are answered with comprehensive reference to interview material fieldnotes videography and audio field recordings As one of the first pieces of ethnomusicological research into sacred music performance in Scotland this ethnography draws important parallels between practices in the North East and elsewhere in the British Isles and across the globe **SCOLAG** ,2004 **Norway Fishing and Aquaculture Industry**

McLusky,Michael Elliott,2004-04-29 For the inhabitants of many of the world s major towns and cities estuaries provide their first and nearest glimpse of a natural habitat Despite the attempts of man to pollute or reclaim it the estuarine ecosystem continues to provide a fascinating insight into a natural world where energy is transformed from sunlight into plant material and then through the steps of a food chain is converted into a rich food supply for birds and fish The book provides a concise readable introduction to estuarine ecology First published in 1981 it soon established itself as the principle textbook of choice in the UK NW Europe This new edition builds upon the strengths of the earlier editions but has been thoroughly revised throughout The new co author brings a human impact dimension to the revised book It is written for advanced undergraduate and graduate students particularly taught masters who have had a general ecology course but no further training in estuarine science It will be useful to both professional researchers and practical managers in marine ecology and environmental science who seek a compact but comprehensive introduction to estuarine ecology
