**Clearance and Improvement** Tom M. Devine, 2010-02-01 Social and economic changes included an increase in production of food and raw materials in turn sustaining the remarkable growth of towns and cities over this period However in the folk memory of Scotland the social and cultural costs of the revolution loom much larger the loss of land for many thousands of families the rise of individualism and the decline of neighborhood the death of old rural societies which had formed Scotland's character for many generations The drama and tragedy of Highland history during this period have attracted many authors whereas the Lowland experience that of the majority of Scots hardly any This book attempts to redress that balance and in so doing examines why this extraordinary era inextricably associated with failure famine and clearance in Gaeldom is remembered as one of improvements in the Lowlands where the folk memory of dispossession if it ever existed is long lost in collective amnesia In so doing Devine addresses an issue which goes right to the heart of the

nation's past      *The Making of the Scottish Rural Landscape* David Turnock, 2016-12-05 This book looks at the evolution of rural settlement in Scotland from the Mesolithic period through to the improving movement of the 18th and 19th centuries. The main emphasis is on changes in society and technology but the book also considers how the development of the physical landscape laid the foundation for such changes. The author strikes a balance between general perspectives including relevant contextual materials such as the political structures and local studies with much emphasis on individual sites. Lack of documentation prior to the 10th century places particular importance on the archaeological evidence but imaginative interpretation of this evidence has led to a major re-evaluation. Ideas emphasizing continuity of settlement and local adaptation are replacing older invasionist theories emphasizing Celtic war lords and broch building pirates      **Mortuary Monuments and Burial Grounds of the Historic Period** Harold Mytum, 2012-12-06 Burial grounds strike an immediate chord with all who visit them. They are landscapes full of pathos and cultural associations which many find attractive though a minority feel are too morbid to deserve detailed attention. This book is designed to offer a framework for studying historic burial ground monuments and contains a certain amount of information regarding below ground archaeology as some projects will involve the study of both. Moreover from a research perspective above and below ground archaeology together can throw considerable light on the process of dying, body disposal and commemoration that formed a continuum for those involved. However the more easily accessible graveyard memorials can be used to study many aspects of past culture beyond that directly associated with death and they are the focus of the book. Most people who become interested in historic graveyard memorials come to the subject via the material itself. Only rarely does a research question get posed and graveyard data seem like an appropriate arena for investigation. This has the advantage that many researchers have some ideas about the data available but the disadvantage that they may not have clear questions to ask of it nor how to set their discoveries in a wider intellectual context      *Scottish Society, 1500-1800* Robert Allen Houston, Ian D. Whyte, 2005-04-18 The volume covers many of the most significant themes in pre-industrial Scottish society      **The Life of John Milton: 1649-1654** David Masson, 1877      **The Life of John Milton** David Masson, 1877      **The Nature of the Cairngorms** Philip Shaw, Des B.A. Thompson, 2006-06-12 The Cairngorms area is arguably the most significant for nature conservation in the British Isles and contains its largest National Park. In this book 35 authors drawing on published and unpublished sources present an up-to-date review of the area's natural features including plants, animals, habitats, geology and landforms. The review falls into three parts. The first and largest part describes the area's rich diversity of nature with each chapter summarising recent research findings, trends and conservation issues for a different landform, habitat or species group. The second part considers deer management, recreation and projected climate change impacts. Part three focuses on rare and threatened species and identifies areas and habitats rich in species for which the Cairngorms are nationally and internationally important.
