**The Rise and Fall of Scottish Industry, 1707-1939** Roy Hucheson Campbell, 1980

*People and Power in Scotland* Roger A. Mason, Norman Macdougall, 2001-01-01 Few Scottish historians are better known than T C Smout and fewer still more deserving of the high esteem in which they are held He has made an outstanding contribution to Scottish historical studies both as an academic discipline and as a subject of wide popular appeal His retirement in 1991 after twelve years as Professor of Scottish History at the University of St Andrews diminished neither his interest nor his output It did however provide a fitting opportunity to honour his accomplishments This collection of ten essays by his friends and colleagues at St Andrews is a measure of his enormous success in promoting Scottish history there and of their respect for his achievements Ranging widely over the Scottish past from the fifteenth to the nineteenth centuries from high politics to popular protest from

shipwrecks to railway mania from local social studies to the problem of national identity the essays pay tribute to the depth of Smout's historical understanding by reflecting the breadth of research that he has done so much to encourage Network North Steve Murdoch, 2006 Discussing a series of economic confessional political and espionage networks this volume provides an illuminating study of network history in Northern Europe in the early modern period The empirically researched chapters advance existing social network theory into accessible historical discussion *Salt* Christopher A. Whatley, Joanna Hambly, 2023-09-14 Salt is a vital commodity For many centuries it sustained life for Scots as seasoning for a diet dominated by grains mainly oats and for preservation of fish and cheese Sea salt manufacturing is one of Scotland's oldest industries dating to the eleventh century if not earlier Smoke and steam emitting panhouses were once a common sight along the country's coastline and are reflected in many of Scotland's placenames The industry was a high status activity with the monarch initially owning salt pans Salt manufacture was later organised by Scotland's abbeys and then by landowners who had access to the sea and a nearby supply of coal As salt was an important source of tax revenue for the government it was often a cause of conflict and military action between Scotland and England The future of the industry and the price of salt for consumers was a major issue during negotiations around the Union of 1707 This book celebrates both the history and the rebirth of the salt industry in Scotland Although salt manufacturing declined in the nineteenth century and was wound up in the 1950s in the second decade of the twenty first century the trade was revived Scotland's salt is now a high prestige green product that is winning awards and attracting interest across the UK
